

TABLE 1  
Commonly applied equity domains in international climate change mitigation efforts

	<b>Object to be allocated on basis of ...</b>	
<b>Focus on</b>	Costs (obligations)	Benefits (rights)
Causes of the problem	I) Moral responsibility (“guilt” for having caused the problem)	III) Previous contributions (to providing the benefits under consideration)
Consequences of the solution	II) Capabilities (capacity to contribute to problem solving)	IV) Need for (or right to) the outcome to be achieved, i.e. goods or services of a policy
