## Appendix A:

### Gazetteer of English and Welsh coin hoards, c.973-1544

This appendix presents a gazetteer of the 815 coin hoards used in this thesis. Entries are arranged firstly by chronological period (see Chapter 3) and then alphabetically by Hoard ID. All information is abstracted directly from the CHMEW database into a standard format.

The first line of each entry provides the unique three-character Hoard ID, followed by its full name. The second line lists the year of discovery – or, where unknown, the year in which the hoard was first reported – and the circumstance of discovery, followed by three data quality ratings; these are presented in order of findspot, context, and numismatic data. The third line lists the phase and period of deposition, followed by the date of deposition and minimum face value of the whole deposit. The fourth line summarises both the numismatic and non-numismatic contents by denomination class or by material and form. The fifth line summarises container information by material and form, and describes the archaeological context by site and feature class.

The sixth line provides references to data sources. While usually given in author-date format (and presented as such in the preceding bibliography), some references derive from unorthodox or unpublished sources, and are either given in full form (auction catalogues or historic newspapers: e.g. ‘Christie’s, 13 October 1992, 5, no. 3’, or ‘*York Herald*, 12 December 1846, 7’) or in abbreviated form. Abbreviations used are as follows: BMTTA: Treasure Trove Archives, Department of Coins and Medals, British Museum; CH: *Coin Hoards* series, Numismatic Chronicle; CHBI: *Coin Hoards from the British Isles* series, British Numismatic Journal; CR: *Coin Register* series, British Numismatic Journal; EMC: *Corpus of Early Medieval Coin Finds* database, Fitzwilliam Museum; HER: Historic Environment Record; TAR: *Treasure Annual Report* series, Department for Culture, Media, and Sport (DCMS); TTRCAR: *Treasure Trove Reviewing Committee Annual Report* series, DCMS. References to unpublished treasure reports are identified by treasure number; in England these follow the format of year and treasure number (e.g. ‘2012 T920’), whereas in Wales they follow the format of source (i.e. TW: Treasure Wales), year, and treasure number (e.g. ‘TW 07.5’).
