

**Table 1. Genetic etiology identified in a total of 46 families affected by DOORS syndrome.**

<b>Genetic etiology</b>	<b>Number of families (%)</b>
<i>TBC1D24</i>	13 (28%)
GPI biosynthesis genes	8 (17%)
<i>ATP6V1B2</i>	8 (17%)
SWI/SNF complex genes (Coffin-Siris syndrome)	5 (11%)
Potassium channel genes (Zimmermann-Laband syndrome)	3 (7%)
Other genes ( <i>UBE3B</i> , <i>TANGO2</i> , <i>SON</i> )	3 (7%)
Unidentified genetic etiology	6 (13%)
