

## Are they Open Yet?

# The impact of Open Access publishing on research libraries

Dr Paul Ayris

Director of UCL Library Services and UCL Copyright Officer

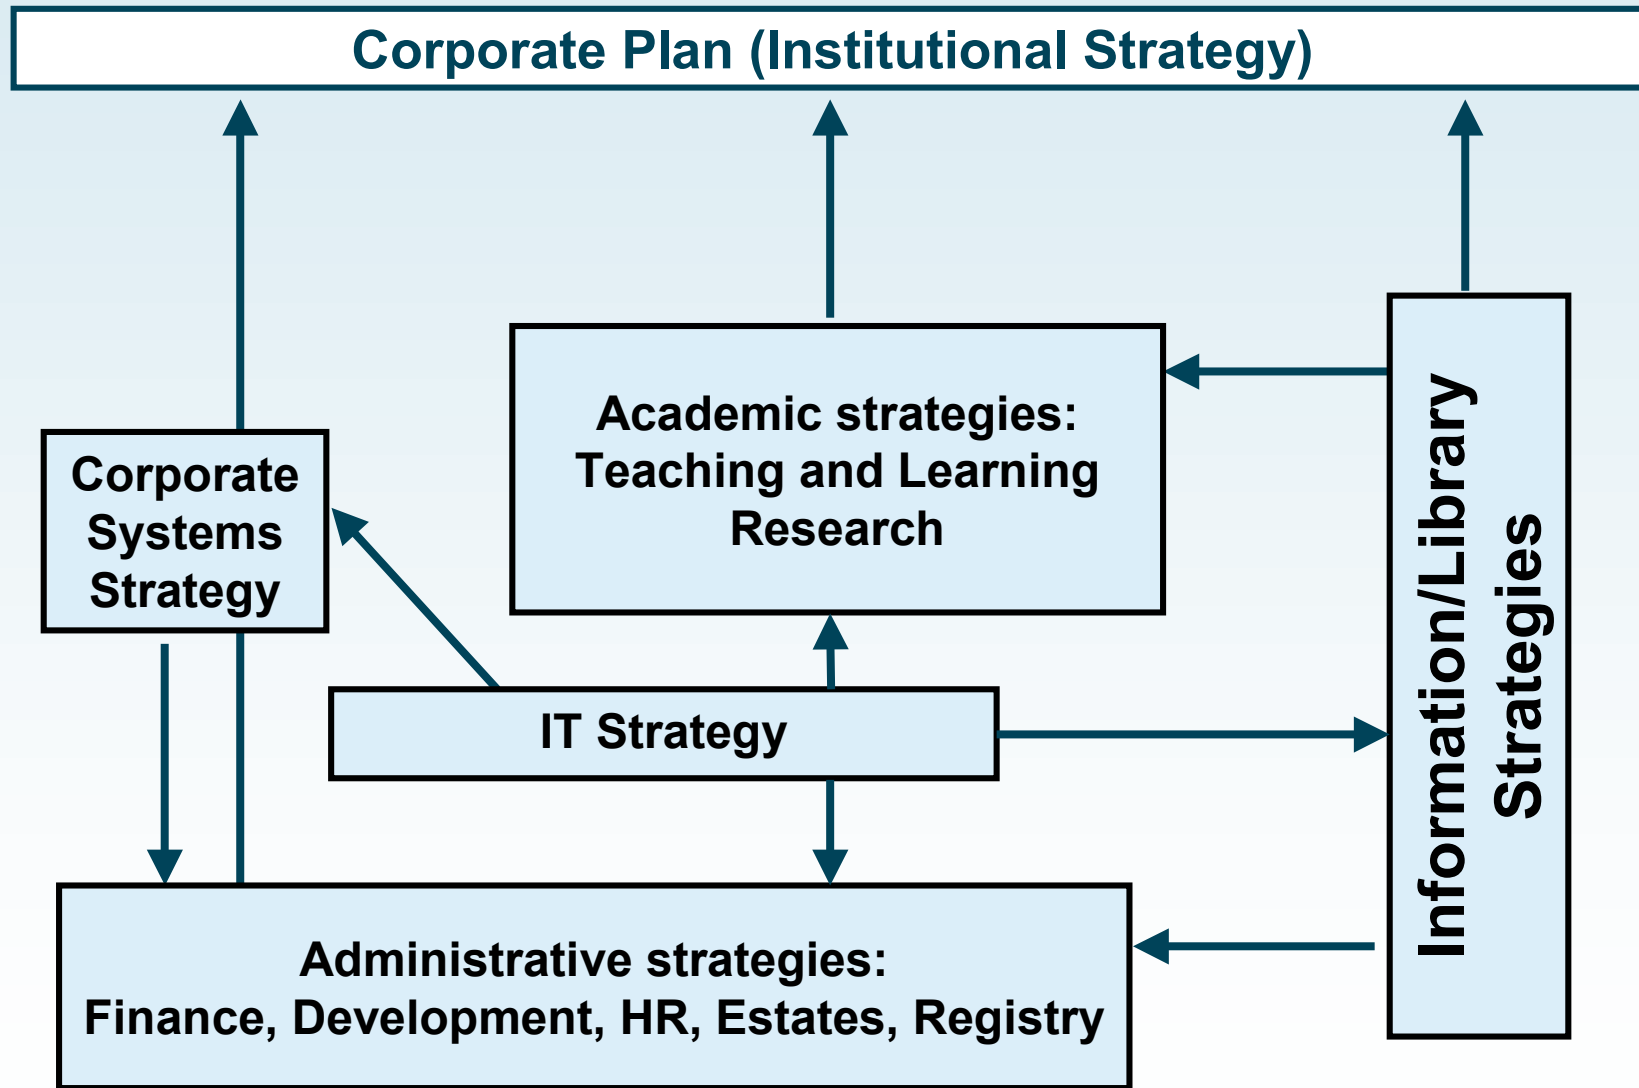

e-mail: [p.ayris@ucl.ac.uk](mailto:p.ayris@ucl.ac.uk)

## Vision: Integrated Information Environment

## JISC – Joint Information Systems Committee

- ❑ Joint Information Systems Committee is a committee of the UK Higher Education Funding Councils
- ❑ JISC funds
  - ❑ JANET (Joint Academic Network) through UKERNA
  - ❑ Development work via project funding
  - ❑ Some national services
- ❑ JISC Journals Working Group has funded studies on Journal Business Models
  - ❑ [http://www.jisc.ac.uk/index.cfm?name=coll\\_jiscejournals\\_jwgs](http://www.jisc.ac.uk/index.cfm?name=coll_jiscejournals_jwgs)

## Business Models for Journal Content

- ❑ UK HE/FE currently has an ‘opt in’ model
  - ❑ JISC negotiates 10 ‘big deals’ a year
  - ❑ Negotiations progress via Negotiating Agent
  - ❑ At end of process, Universities decide whether or not to buy
- ❑ Can a national licence offer better Value for Money?
- ❑ Are North European models helpful here?
- ❑ More evaluation needed of Open Access models
  - ❑ What is the effect of ‘author/funder pays’ model at an institutional level?

## JISC Studies

- What about other models?
- Consortium of Research Libraries (CURL) undertook separate studies
  - <http://www.curl.ac.uk/>
- CURL worked on a Core+Periphery model
  - CURL found that VAT made this model more expensive in UK
- Pay-per-View
  - pre-purchase or post-purchase?
- Journals Working Group to investigate some of these models further

# Content

- Information landscape
- User as researcher

## User as researcher

- JISC also commissioned analysis of NESLI2 usage statistics
  - [http://www.jisc.ac.uk/index.cfm?name=coll\\_jiscejournals\\_jwgs](http://www.jisc.ac.uk/index.cfm?name=coll_jiscejournals_jwgs)
- Old universities request more full text articles
- No other distinguishing features between 'types' of university
- Total number of requests is increasing
- STM (Science, Technology & Medicine) predominates in offerings

## User as researcher

- Cost of requests per user broadly similar in all libraries for subscribed and unsubscribed titles
- Small percentage of titles generates high levels of use
- Additional costs of acquiring all titles result in low costs per request for unsubscribed titles

## User as researcher

### Recommendations

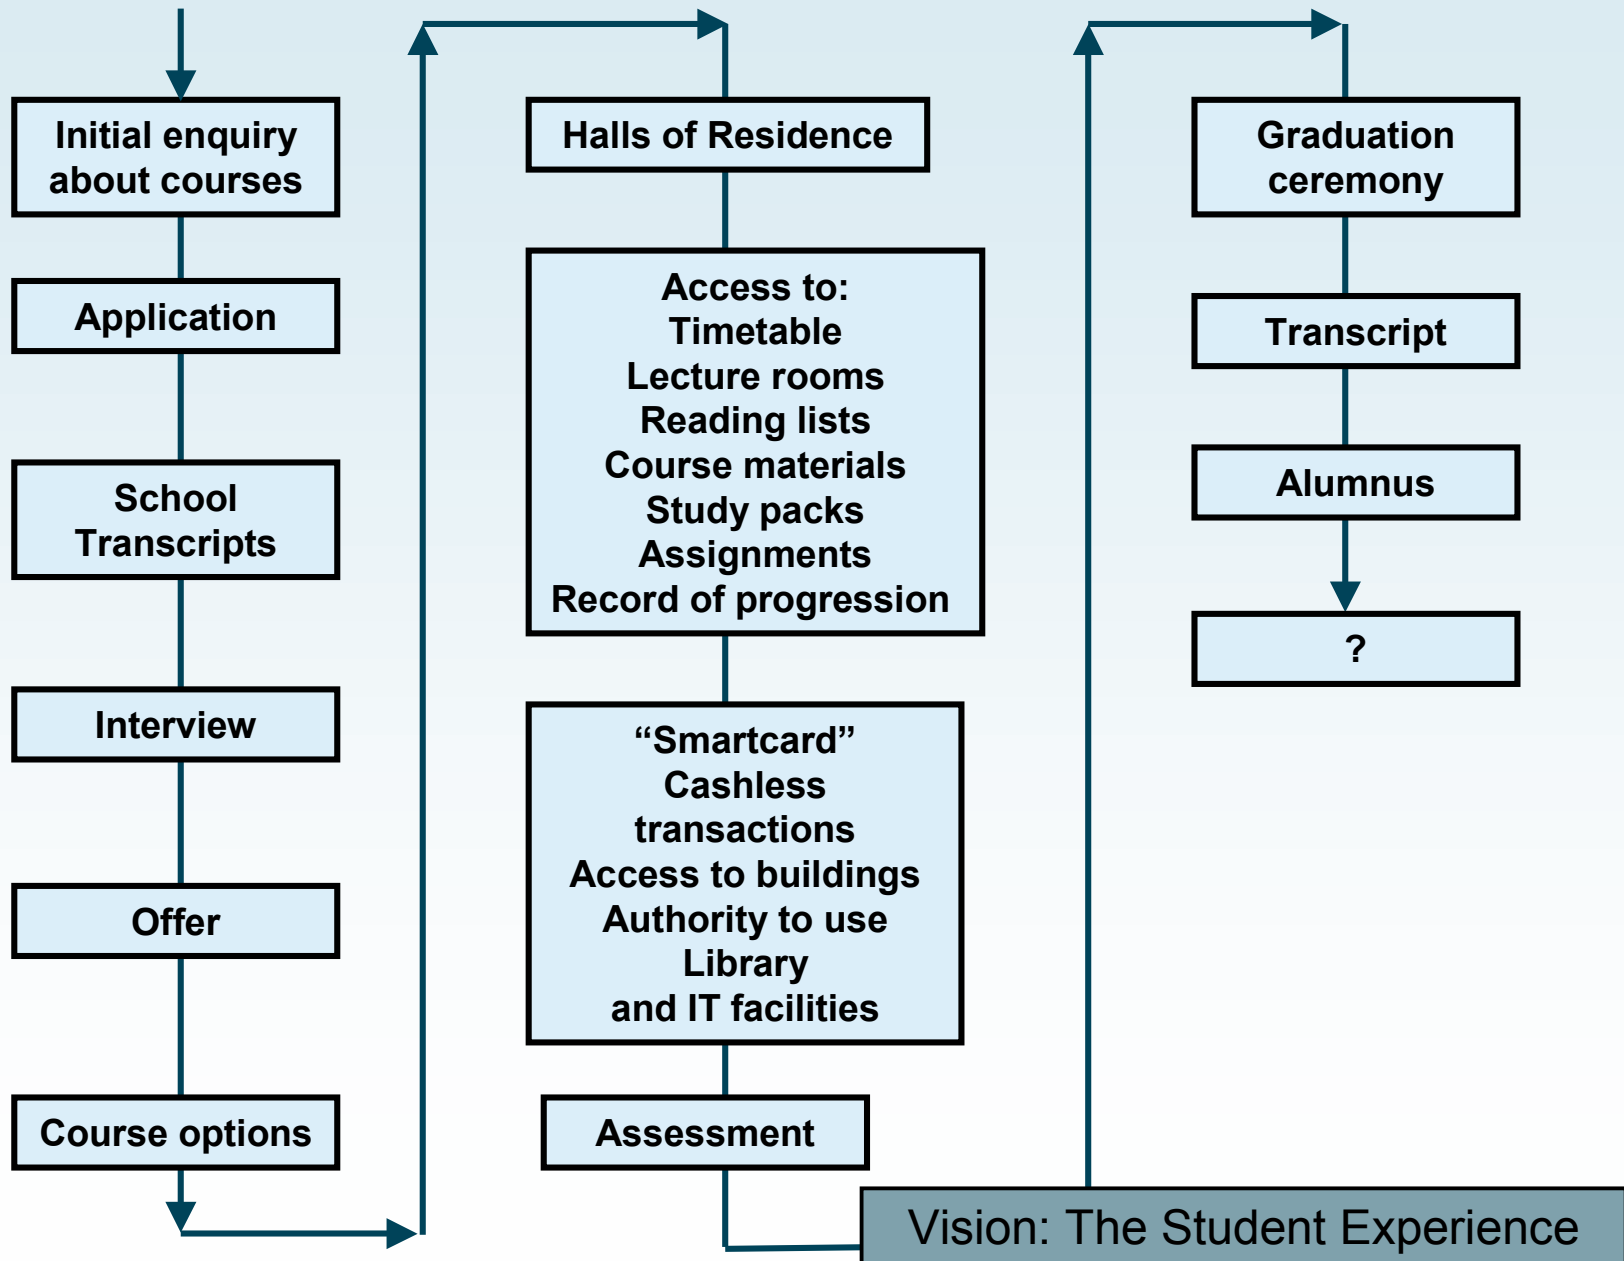

Single national deal?

Portal site for COUNTER-compliant usage statistics

Libraries to review their organizational structures for managing e-delivery

## UCL Taught Student Survey 2000

Survey Results digram (full size)

[Back to Article](#)

## Snapshot

- Questionnaires sent to a random sample of taught students
- Results
- E-Learning does not figure in the responses
  - Most significant answers were:
    - Buy more set texts
    - No-one wanted more e-resources
    - Spend more on the Library

## Challenges

- ❑ VLE/MLE not yet embedded in many universities
- ❑ Need is for e-texts/core readings, **not** research journals
  - ❑ Publishers have no business model for this form of delivery
  - ❑ Blanket Digital Licence from Copyright Licensing Agency covering UK publishers forthcoming
- ❑ E-Book offerings do not meet UK students' needs
  - ❑ Questionable academic quality and North American in context
- ❑ E-Books are not popular with users
- ❑ Academics need to re-skill to use e-approaches to learning and teaching

## Drivers for change

- Market-led**
- Students, paying top-up fees of £3,000 per year, are consumers
- Postgraduate students expect joined-up, electronic delivery
  - Experienced this delivery in undergraduate courses elsewhere?
- E-delivery enhances experience by 24x7 delivery
- Googlization of content delivery

3. Student as learner
4. National UK Frameworks
  - JISC/BL Agreement
  - Research Information Network

## JISC/BL Agreement

- ❑ British Library re-purposing itself
  - ❑ <http://www.bl.uk/about/cooperation/jisc.html>
- ❑ Two strategic meetings per year between Chief Executives
- ❑ Most of the collaborations are in projects
  - ❑ But BL cannot be fund holder; HE partner required
- ❑ BL/JISC Partnership Manager appointed – Neil Beagrie
- ❑ Two partners engaged in courtship; certainly not engagement or marriage

## RIN – Research Information Network

- ❑ New initiative in UK
- ❑ Director is Dr Michael Jubb – Michael.Jubb@bl.uk
- ❑ Founded for a three-year period with £3 million
- ❑ Mission
  - ❑ **To lead and co-ordinate new developments in the collaborative provision of research information for the benefit of researchers in the UK**
  - ❑ **The key role of the RIN is to give the strategic leadership required to establish a national framework for research information provision, and to generate effective and sustainable arrangements for meeting the information needs of the professional research community**

## Research Information Network

- ❑ Strategic Plan available, identifying six strategic aims
  - ❑ **Aim 1. To develop, with the active involvement of key stakeholders, a strategic framework for enhancing the UK research information infrastructure**
  - ❑ **Aim 2. To ensure that the research community contributes to and collaborates in a programme of action tailored to its needs:**
  - ❑ **Aim 3. To act as an advocate for research information provision at the highest levels of policy-making in the UK, and to represent the interests of UK researchers in relevant international forums**

## Research Information Network

- Aim 4. To co-ordinate action to improve the arrangements for researchers to find information sources relevant to their work, and how they may gain access to them**
- Aim 5. To lead the development of a programme to sustain and enhance management and development of the aggregate UK collection of published hard copy research resources:**
- Aim 6. To co-ordinate action to ensure that the outputs researchers produce and need are retained and made available for use in the most effective way:**
  - In terms of Open Access
  - Published and unpublished material from different sources is made available interoperably to researchers, with as few restrictions as possible on the accessibility of material

## UK Parliamentary Enquiry

- ❑ UK Parliamentary enquiry into STM publishing
  - ❑ <http://www.publications.parliament.uk/pa/cm200304/cmselect/cmstech/399/39902.htm>
- ❑ House of Commons Select Committee on Science and Technology is immensely significant
- ❑ Committee received evidence from all stakeholders
- ❑ Attendance at the Committee's open meetings was packed
  - ❑ Chairman, Dr Ian Gibson, said in committee that the issue was clearly of public interest. The Committee wanted to know why!
- ❑ National press coverage has ensured that enquiry has penetrated public consciousness
- ❑ Parliamentary debate to follow in autumn 2005?

## Findings - Repositories

- Funders should mandate funded researchers to self-archive their papers in repositories
- Need for a joined-up repository initiative, allowing single-site searching and access
- Need to address quality-assurance issues, perhaps with “kite-marking”
- Need to overcome copyright barriers

## Findings – Author/Funder Pays model

- For Journal Publishing
- Early indications that an Author Pays model could work, replacing subscriptions
- Government should facilitate this work – Research Councils should make funds available for authors to experiment
- Sticking points: “free-riders”, learned societies, copyright and, in certain contexts, peer review

## Responses - Organisational

- UK Government so far declines to act
- Research Councils UK to mandate deposit for funded research outputs?
  - <http://www.rcuk.ac.uk/access/index.asp>
  - Statement being opposed by commercial publishers
- Wellcome Trust also mandating deposit 'within six months of publication'
  - <http://www.wellcome.ac.uk/doc%5Fwtx025191.html>
- NIH requests deposit of funded outputs within 12 months of publication
  - <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-05-022.html>

## Responses - Publishers

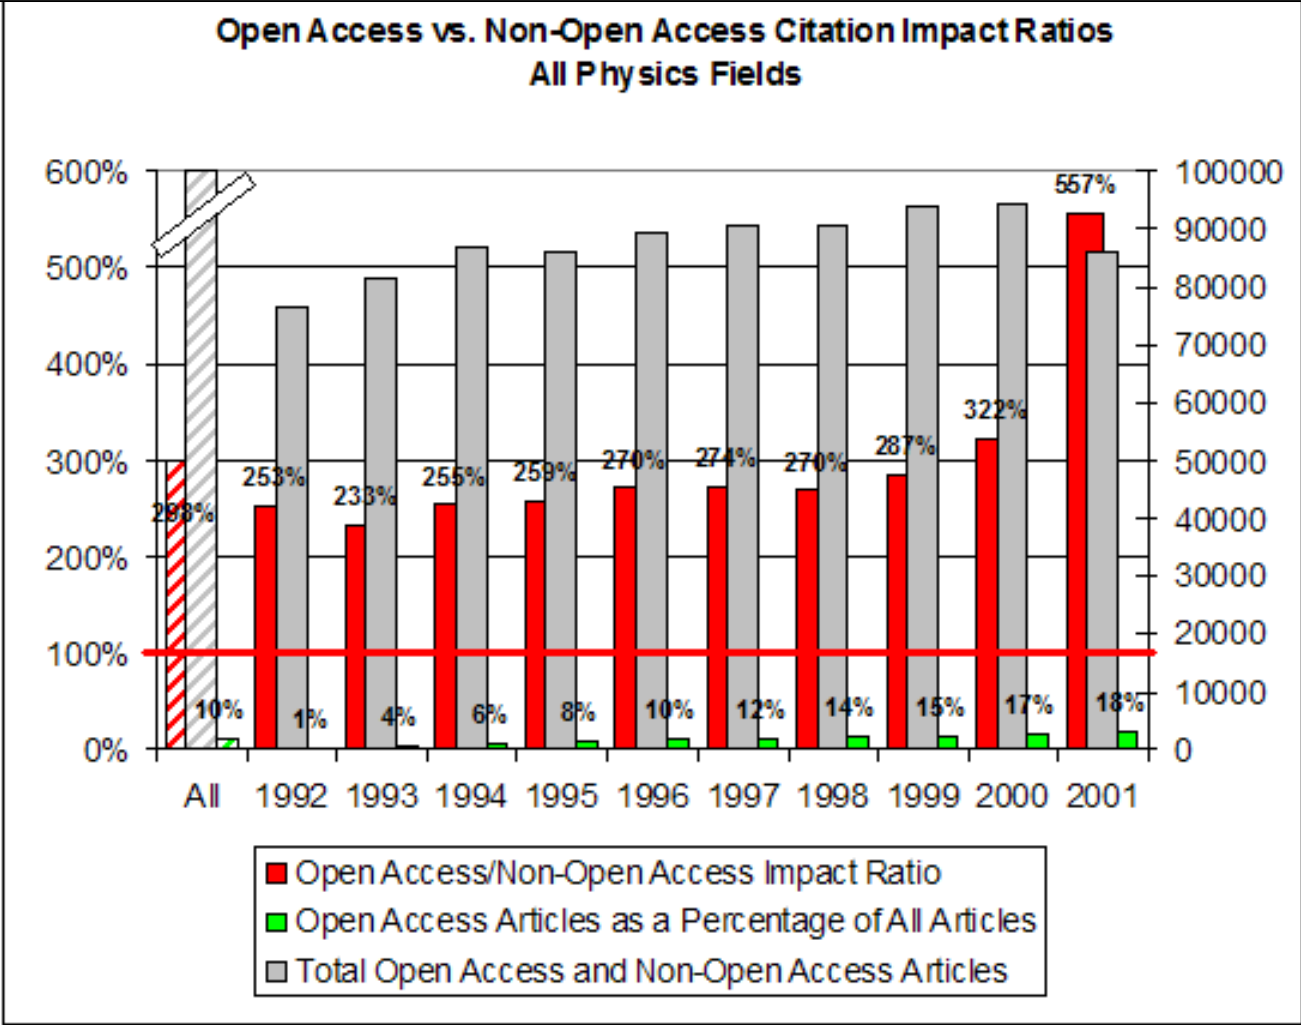

- Impose embargoes on the immediate deposit in Open Access repositories
- Experiment with some hybrid forms
  - Institute of Physics Publishing - *New Journal of Physics* at <http://www.iop.org/EJ/njp>
- 'Redefine' ideas of open access
  - Authors pay for open access from publisher, but still cannot use, post or pass on their articles –
  - Articles are just posted on a publisher-controlled open access server

## Repositories

### – Institutional and Subject-based

- New policy statement from RCUK should help
- SHERPA has 20 institutional e-print repositories
  - See <http://www.sherpa.ac.uk/>
- Part of an international movement
  - DARE (Netherlands) -  
<http://www.surf.nl/en/themas/index2.php?oid=7>
  - Overview at <http://www.surf.nl/download/country-update2005.pdf>
- Repositories add visibility to researchers' output

**Impact Studies for Open Access**  
 Harnad and Brody at <http://www.dlib.org/dlib/june04/harnad/06harnad.html>

**Figure 1. The OA Advantage in Physics.**

## Repositories – The Future

- ❑ Key is to add value, not to compete with commercial products
- ❑ New JISC Repositories Call (03/05) will help to extend the range and scope of institutional repositories
  - ❑ [http://www.jisc.ac.uk/index.cfm?name=funding\\_circular3\\_05](http://www.jisc.ac.uk/index.cfm?name=funding_circular3_05)
- ❑ Feature is the linking of primary data to repositories of secondary research articles

# Content

- Information landscape
- User as researcher
- Student as learner
- National UK Frameworks
- Institutional Repositories
- Conclusions

## Conclusions

- ❑ Universities have a Vision for the future
- ❑ Researchers in STM are happy with the 'big deal'
- ❑ UK has to examine new subscription models for serials
- ❑ Learners not yet well served by high quality e-offerings
- ❑ Institutional Repositories are, as yet, in their infancy
- ❑ Open Access is on institutional agendas, but slow to develop, lacking widespread academic support
- ❑ Mandate of Funders is crucial to future developments

## And now

- Thanks for listening
- Questions, and perhaps, some Answers
