

Supplement: Drug repurposing for ageing research using model organisms

Top 15 scoring compounds for *D. melanogaster* targeting at least one protein implied in ageing not targeted by a higher ranked compound.

Rank	PDB HET Code	Name*	Targets**	global identity	binding site identity	Ageing Implication	Domain conservation	Binding site conservation	Binding affinity	Bio-availability	Lipinski Loss	Promiscuity Loss	Purchasability Bonus	Drug approval Bonus	Final Score
