Table S4

Correlations of the DRS_ORI and the IPO with clinical measures, total clinical distress as measured with the SCL-90, depression as measured with the BDI and dissociative features as measured with the DIS-Q

	DRS				IPO			*M*	*SD*
	DR-M	DR-F	DR-P	DR-S	IPO-ID	IPO-PD	IPO-RT		
SCL-90	-.078	-.113	-.117	-.109	.617**	.574**	.573**	2.572	.71
BDI	-.031	-.041	-.304	-.155	.558**	.497**	.436**	2.0737	.56
DISQ	-.003	-.120	-.214	-.092	.767**	.717**	.786**	1.9992	.54

SCL-90 = total score of clinical distress, BDI = total depression score on the Beck Depression Inventory, DISQ = dissociation Questionnaire total score.
*P < .05 **p < .01
