### **3      Llyn Llagi**

**Figure 1 Llyn Llagi. Setting out a macrophyte transect, looking towards Snowdon, 29<sup>th</sup> July 2015.**

#### **3.1    Summary Overview**

Chemical and biological sample collection, analysis and data collation, quality control and archiving proceeded without any problems at Llyn Llagi during the period from April 2015 to March 2016.

The Network was notified of an application for a micro-hydro scheme on the outflow of Llyn Llagi. Whilst the majority of monitoring occurs in the lake itself, the proposed hydro take-off would severely disrupt the outflow logger and the scheme would affect the outflow fish monitoring sections. Planning details and documents can be viewed [here](#).

#### **3.2    Water Chemistry**

Samples were collected by CEH in early June, September and December 2015, delivered to the analytical laboratories on schedule and have been analysed, quality controlled and archived in the UKUWMN central chemistry database at CEH Lancaster. March 2016 samples have been collected and are in the process of being analysed.

#### **3.3    Sediment Traps**

Sediment traps were recovered and replaced on the 29<sup>th</sup> of July 2015 by a team from ENSIS. Spheroidal Carbonaceous Particles in the sediment retrieved from the traps are currently being analysed. The sediment trap diatoms have been made into slides and await funding for analysis.

### **3.4 Thermistors**

Lake top and bottom thermistors and the thermistor chain were removed and replaced on the 29<sup>th</sup> of July 2015 by a team from ENSIS. All had functioned well during the previous year and the data were added to the ENSIS and MS thermistor water temperature database.

### **3.5 Epilithic Diatoms**

Epilithic diatoms were retrieved by a team from ENSIS from three sampling points around the lake on the 29<sup>th</sup> of July 2015. The samples have been made into slides.

### **3.6 Macroinvertebrates**

Aquatic macroinvertebrates were sampled on the 15<sup>th</sup> April 2015 by a team from QMuL. Five 1 minute kick samples were performed. The samples were counted and the data sent to ENSIS Ltd. The data is in the process of being quality screened before being added to the UKUWMN biological database at ENSIS.

### **3.7 Fish**

Due to resourcing cuts, fish surveying was not performed in Autumn 2015.

### **3.8 Aquatic Macrophytes**

Aquatic macrophytes were surveyed by a team from ENSIS on 29<sup>th</sup> of July 2015 using both UKUWMN and CSM standard methodologies. Data will be added to the ENSIS biological database after microscope confirmation of bryophyte identifications.

### **3.9 Data Management and Reporting**

No problems or hiatus occurred with the collation and transfer of data within methodological programmes, or to the UKUWMN databases, during the reporting period.

The 2014-2015 annual report has been uploaded to the UKUWMN web page. The section on Llyn Llagi appears in section 3.11 below.

The UKUWMN website page detailing Llyn Llagi can be found here:  
[http://awmn.defra.gov.uk/sites/site\\_15.php](http://awmn.defra.gov.uk/sites/site_15.php)

Further publications from the contract period utilizing UKUWMN data from Llyn Llagi are detailed in section 3.10 below.

## **4 Llyn Cwm Mynach**

**Figure 2 Llyn Cwm Mynach. Looking southeast from the North West end of the lake, 28<sup>th</sup> July 2015.**

### **4.1 Summary Overview**

Chemical and biological sample collection, analysis and data collation, quality control and archiving proceeded without any problems at Llyn Cwm Mynach during the period from April 2015 to March 2016.

A supplementary CEH and Woodland Trust project continues to look at the effects of differing forestry practices in the catchment, with water samples being analysed at CEH Bangor.

### **4.2 Water Chemistry**

Samples were collected by CEH in early June, September and December 2015, delivered to the analytical laboratories on schedule and have been analysed, quality controlled and archived in the UKUWMN central chemistry database at CEH Lancaster. March 2016 samples have been collected and are in the process of being analysed.

### **4.3 Sediment Traps**

Sediment traps were recovered and replaced on the 28<sup>th</sup> of July 2015 by a team from ENSIS. Spheroidal Carbonaceous Particles in the sediment retrieved from the traps are currently being analysed. The sediment trap diatoms have been made into slides and await funding for analysis.

## **4.4 Thermistors**

Lake top and bottom thermistors and the thermistor chain were removed and replaced on the 28<sup>th</sup> of July 2015 by a team from ENSIS. All had functioned well during the previous year and the data were added to the ENSIS and MS thermistor water temperature database.

## **4.5 Epilithic Diatoms**

Epilithic diatoms were retrieved by a team from ENSIS from three sampling points around the lake on the 28<sup>th</sup> of July 2015. The samples have been made into slides.

## **4.6 Macroinvertebrates**

Aquatic macroinvertebrates were sampled on the 15<sup>th</sup> April 2015 by a team from QMuL. Five 1 minute kick samples were performed. The samples were counted and the data sent to ENSIS Ltd. The data is in the process of being quality screened before being added to the UKUWMN biological database at ENSIS.

## **4.7 Fish**

Due to resourcing cuts, fish surveying was not performed in Autumn 2015.

## **4.8 Aquatic Macrophytes**

Aquatic macrophytes were not surveyed at Llyn Cwm Mynach in 2015.

## **4.9 Data Management and Reporting**

No problems or hiatus occurred with the collation and transfer of data within methodological programmes, or to the UKUWMN databases, during the reporting period.

The 2014-2015 annual report has been uploaded to the UKUWMN web page. The section on Llyn Cwm Mynach appears in section 4.11 below.

The UKUWMN website page detailing Llyn Cwm Mynach is here:  
[http://awmn.defra.gov.uk/sites/site\\_16.php](http://awmn.defra.gov.uk/sites/site_16.php)

Further publications from the contract period utilizing UKUWMN data from Llyn Cwm Mynach are detailed in section 4.10 below.

## 4.11.2 Macroinvertebrate data

### 4.11.2.1 Percentage abundance summary, Llyn Cwm Mynach

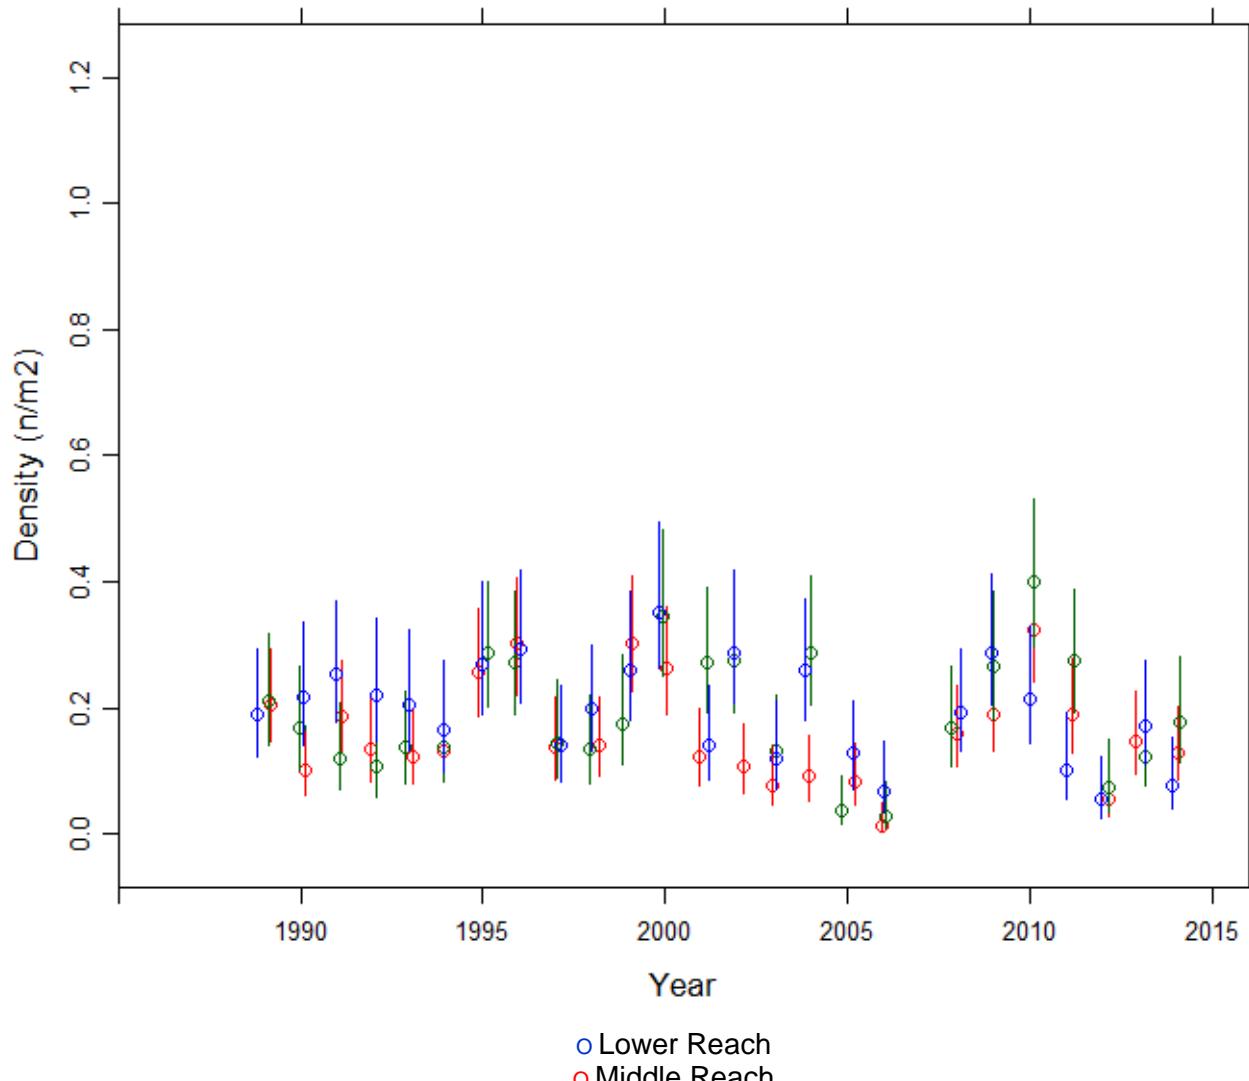

#### 4.11.2.1 Macroinvertebrate summary statistics, Llyn Cwm Mynach

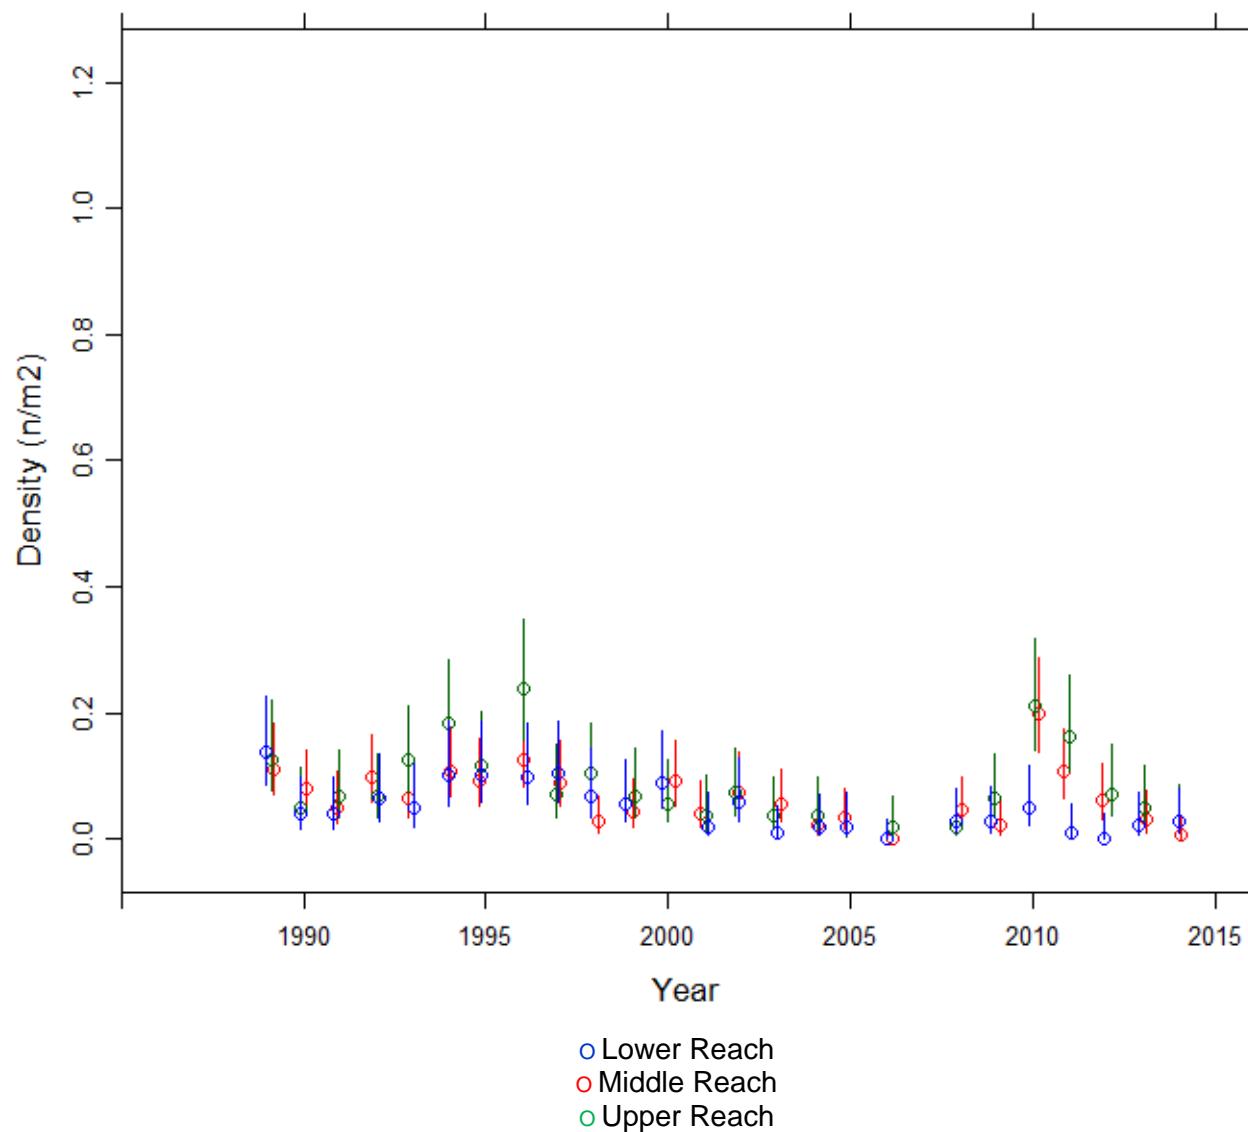

### 4.11.3 Fish data (for outflow stream)

#### 4.11.3.1 Summary of Trout fry density (numbers m<sup>-2</sup>), Llyn Cwm Mynach

Fishing no longer funded after 2014.

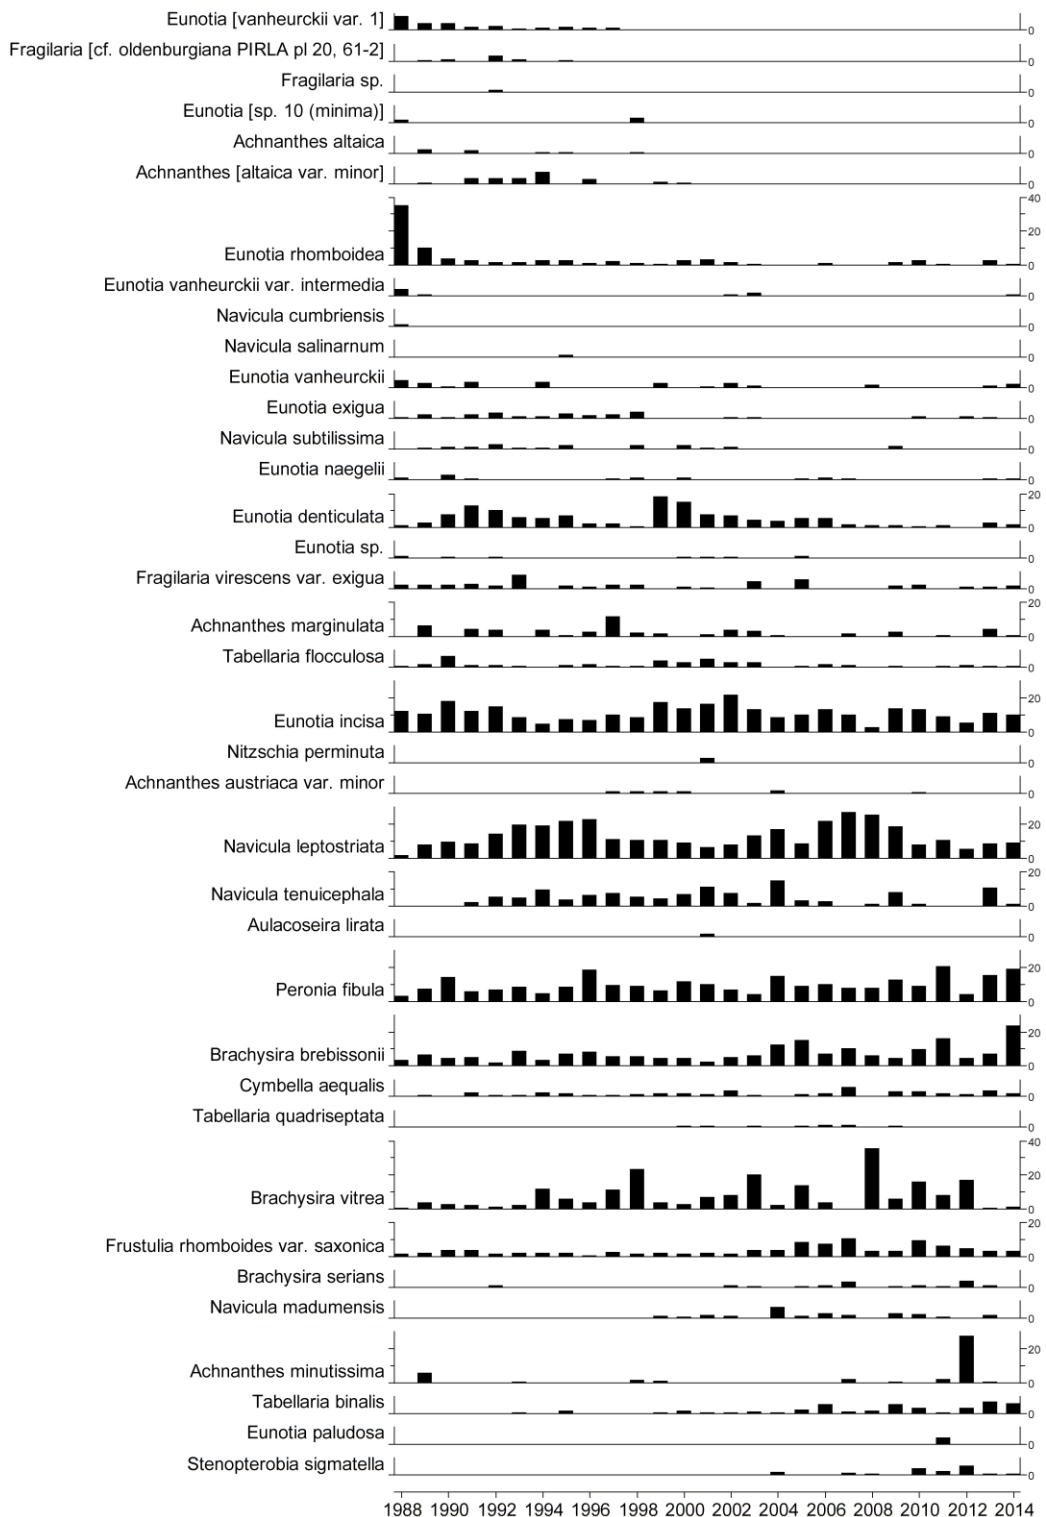

#### 4.11.3.2 Summary of Trout parr density (numbers m<sup>-2</sup>), Llyn Cwm Mynach

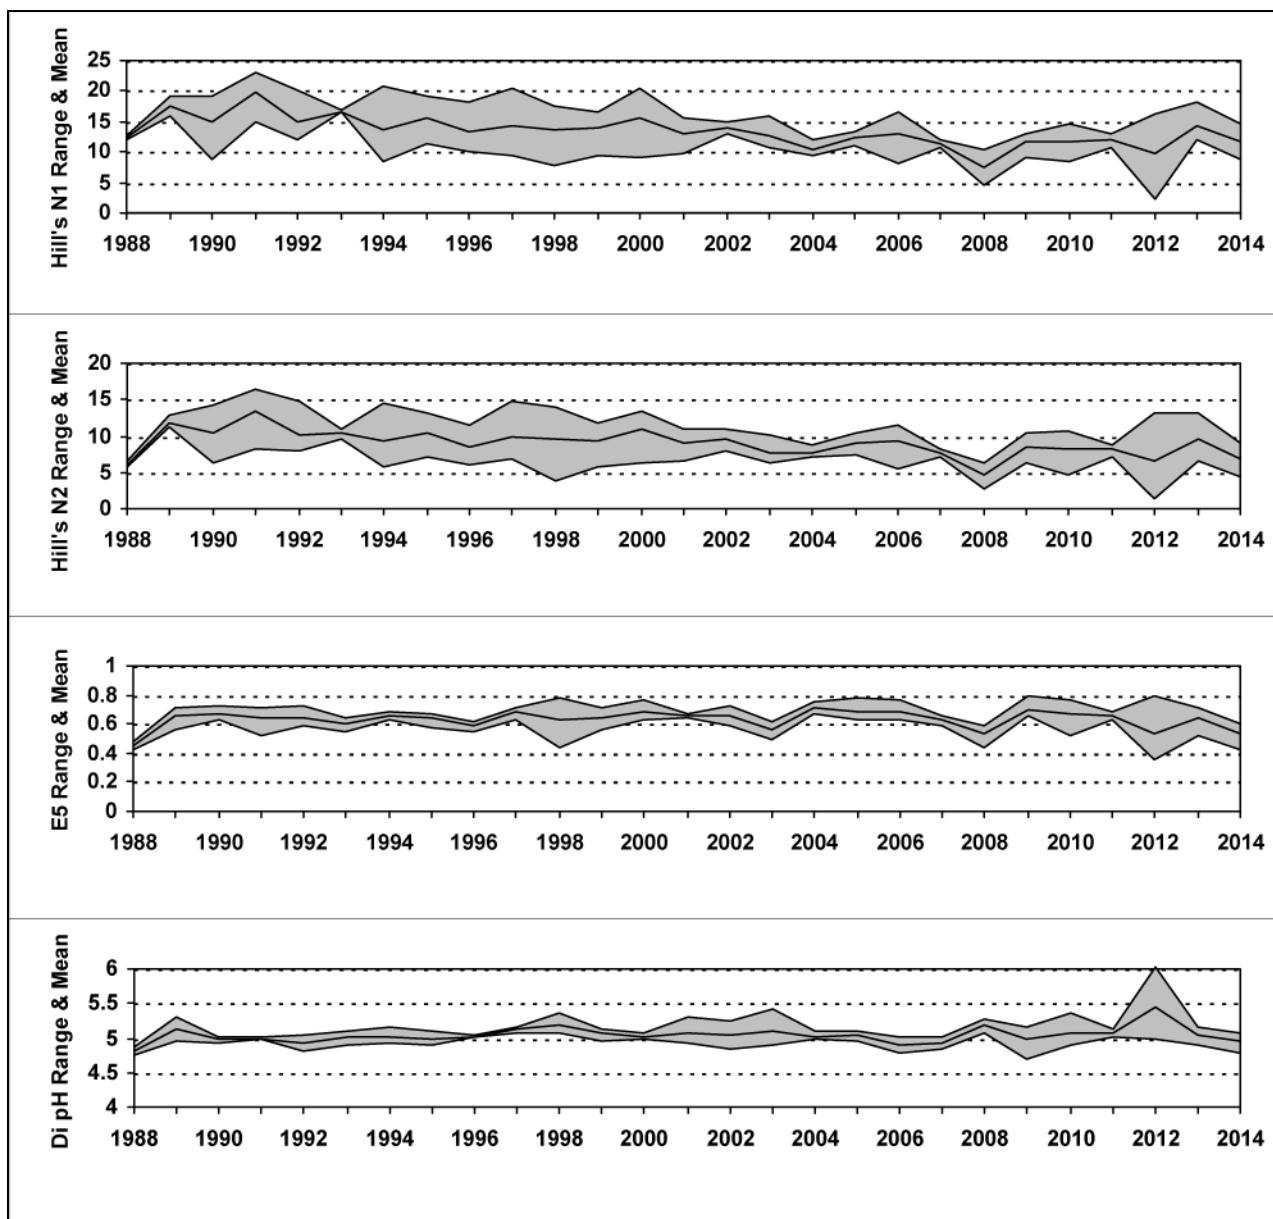

Fishing no longer funded after 2014.

## 4.11.4 Epilithic diatom data

### 4.11.4.1 Percentage abundance summary, Llyn Cwm Mynach

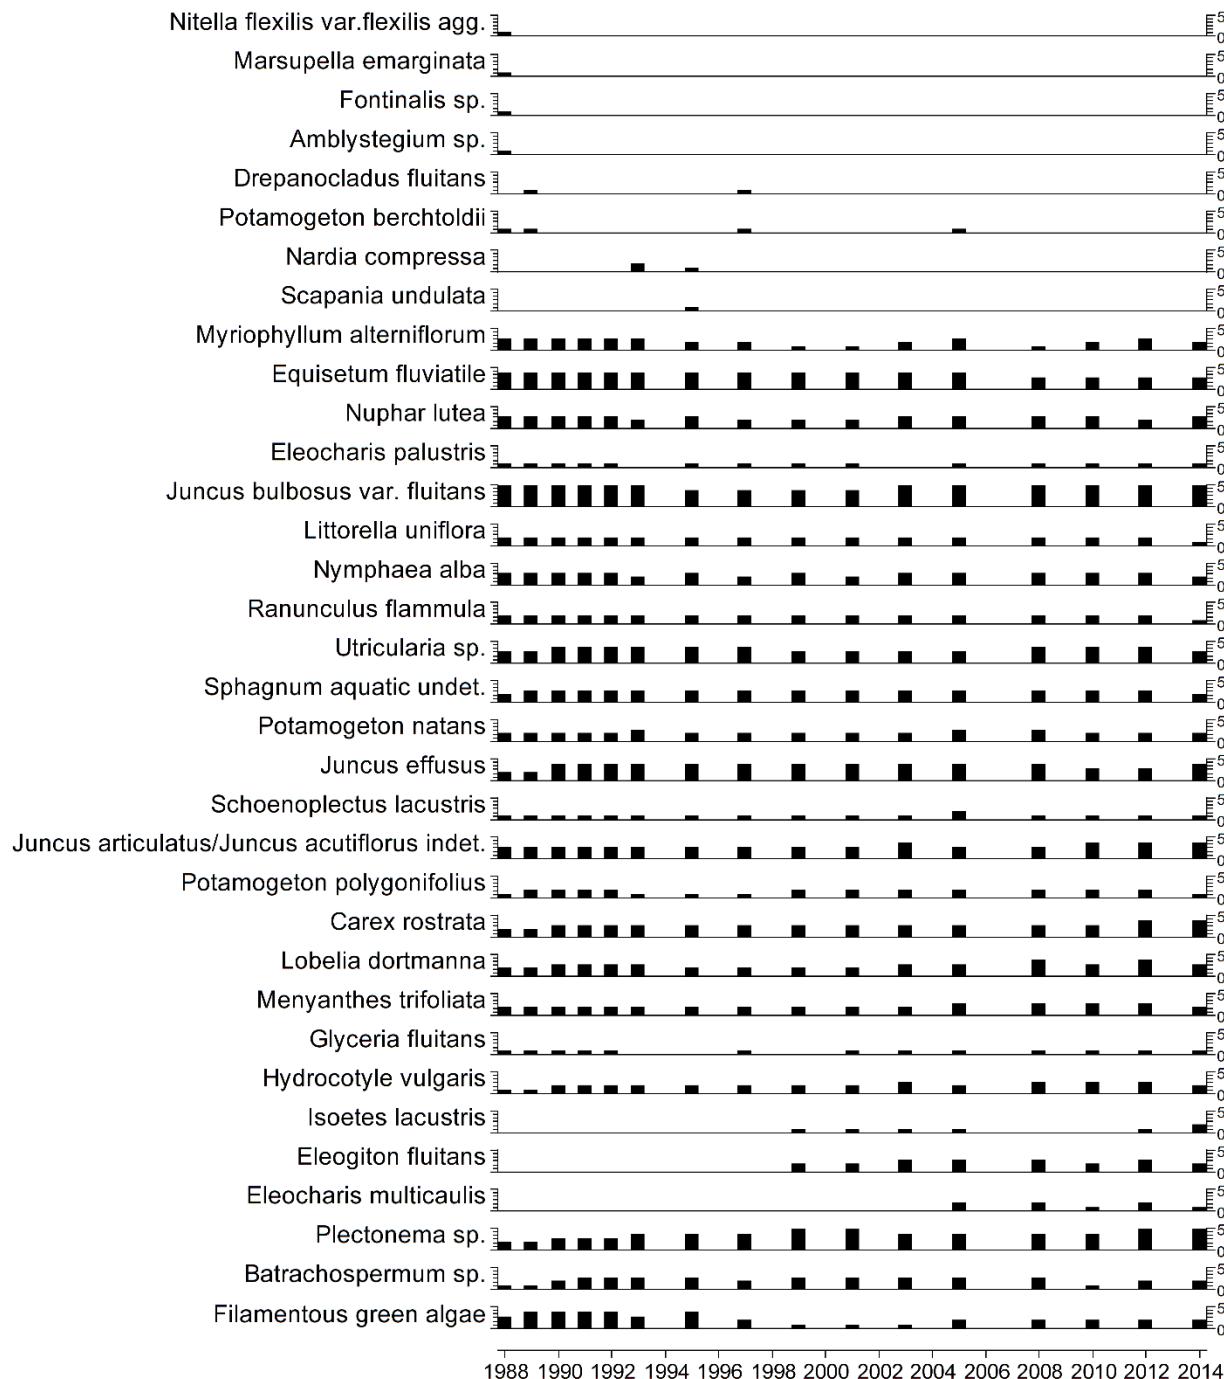

#### 4.11.4.2 Diatom summary statistics, Llyn Cwm Mynach

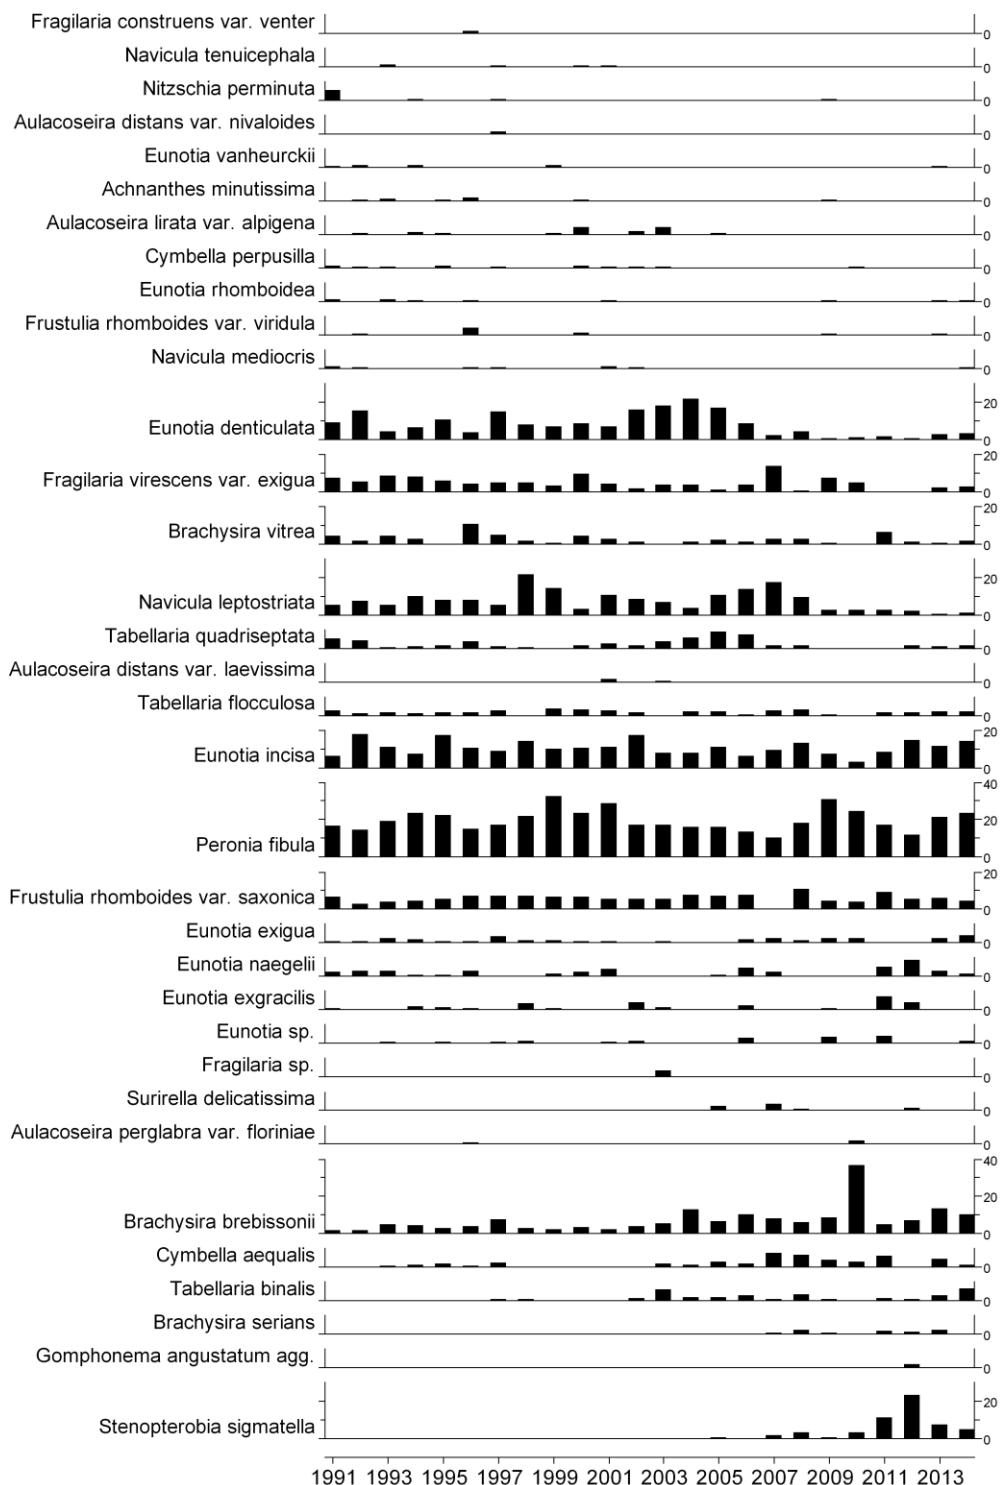

## 4.11.5 Aquatic macrophyte data, Llyn Cwm Mynach

### Species Scores (1-5)

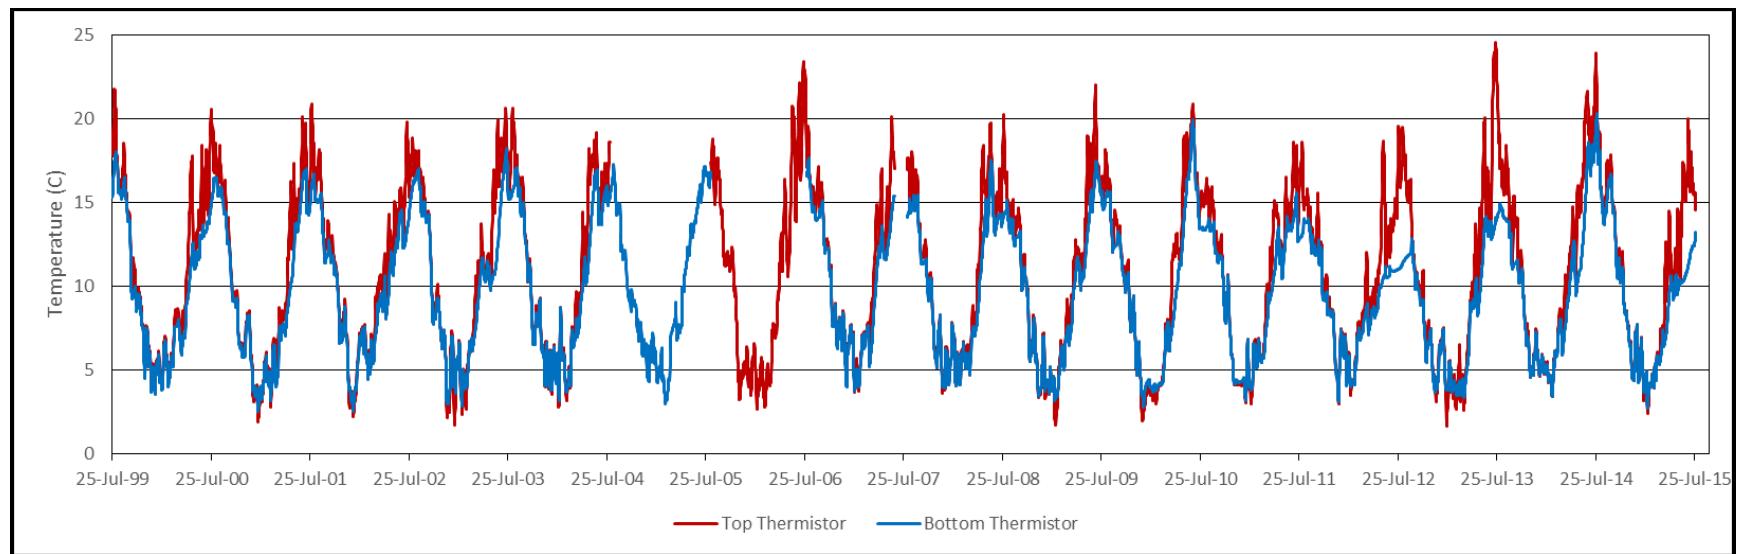

## 4.11.6 Sediment trap data, Llyn Cwm Mynach

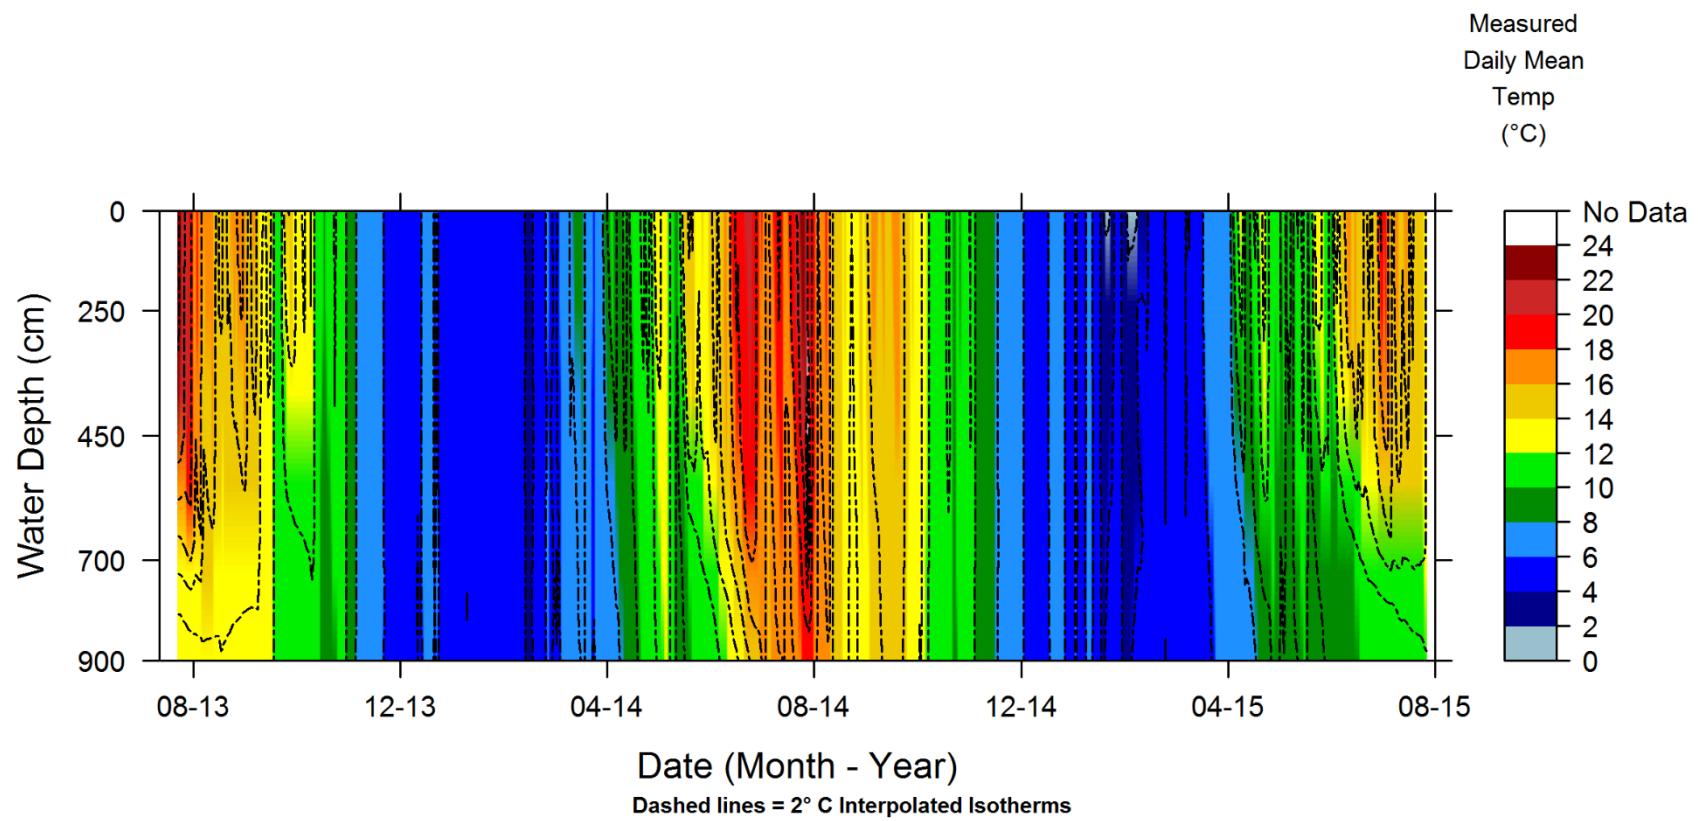

### Relative percentage frequency of diatom taxa

#### 4.11.7 Sediment trap thermistor data, Llyn Cwm Mynach

#### 4.11.8 Thermistor chain data, Llyn Cwm Mynach

## **5      Afon Hafren**

**Figure 3 Afon Hafren biological survey section 18<sup>th</sup> September 2015**

### **5.1    Summary Overview**

Chemical and biological sample collection, analysis and data collation, quality control and archiving proceeded without any problems at Afon Hafren during the period from April 2015 to March 2016.

### **5.2    Water Chemistry**

Samples were collected by CEH early every month throughout the period April 2015 to March 2016, delivered to the analytical laboratories on schedule and are in the process of being analysed, quality controlled and archived in the UKUWMN central chemistry database at CEH Lancaster.

### **5.3 Thermistors**

The MS thermistor at Afon Hafren functioned well throughout the period April 2015 to September 2015 when, unfortunately, the thermistor fixtures failed and the thermistor had to be removed from the site. High flows on subsequent site visits have delayed reinstallation. Data up to September 2015 have been downloaded, checked and archived in the central ENSIS and MS temperature database.

### **5.4 Epilithic Diatoms**

Epilithic diatoms were retrieved by a team from ENSIS from three sampling points in the stream on the 8<sup>th</sup> of July 2015. The samples have been made into slides.

### **5.5 Macroinvertebrates**

Aquatic macroinvertebrates were sampled on the 15<sup>th</sup> April 2015 by a team from QMuL. Five 1 minute kick samples were performed. The samples were counted and the data sent to ENSIS Ltd. The data is in the process of being quality screened before being added to the UKUWMN biological database at ENSIS.

### **5.6 Fish**

Due to resourcing cuts, fish surveying was not performed in Autumn 2015.

### **5.7 Aquatic Macrophytes**

Aquatic macrophytes were surveyed by a team from ENSIS on 18<sup>th</sup> of September 2015. Percentage cover scores were recorded and data will be added to the ENSIS biological database after microscope confirmation of bryophyte identifications.

### **5.8 Data Management and Reporting**

No problems or hiatus occurred with the collation and transfer of data within methodological programmes, or to the UKUWMN databases, during the reporting period.

The 2014-2015 annual report has been uploaded to the UKUWMN web page. The section on on Afon Hafren appears in section 5.10 below.

The UKUWMN website page detailing Afon Hafren can be found here:  
[http://awmn.defra.gov.uk/sites/site\\_17.php](http://awmn.defra.gov.uk/sites/site_17.php)

Further publications from the contract period utilizing UKUWMN data from Afon Hafren are detailed in section 5.9 below.

## 5.10.2 Macroinvertebrate data

### 5.10.2.1 Percentage abundance summary, Afon Hafren

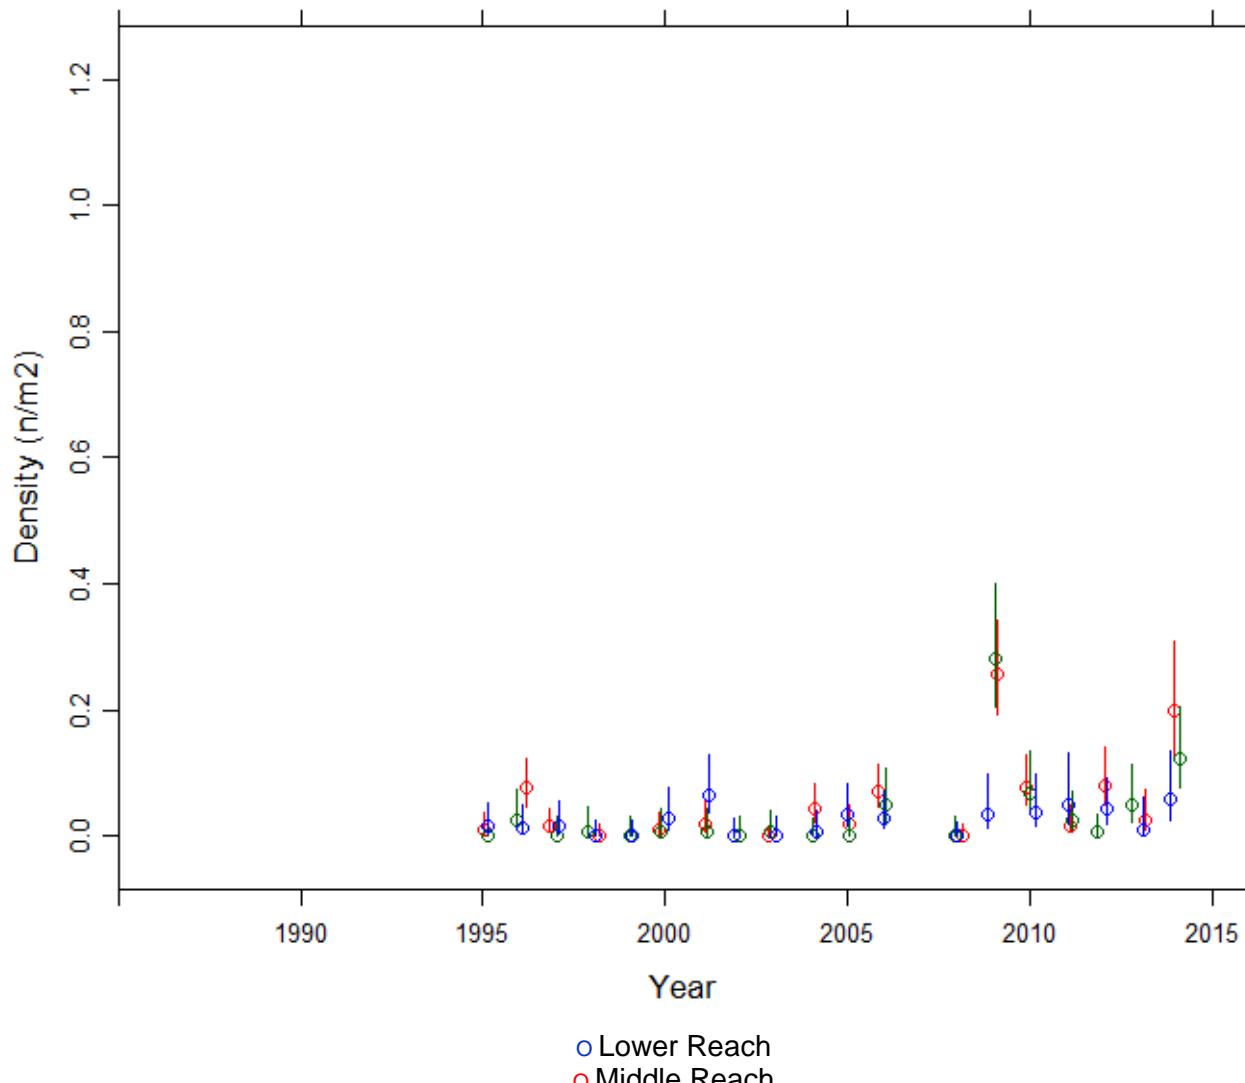

### 5.10.2.1 Macroinvertebrate summary statistics, Afon Hafren

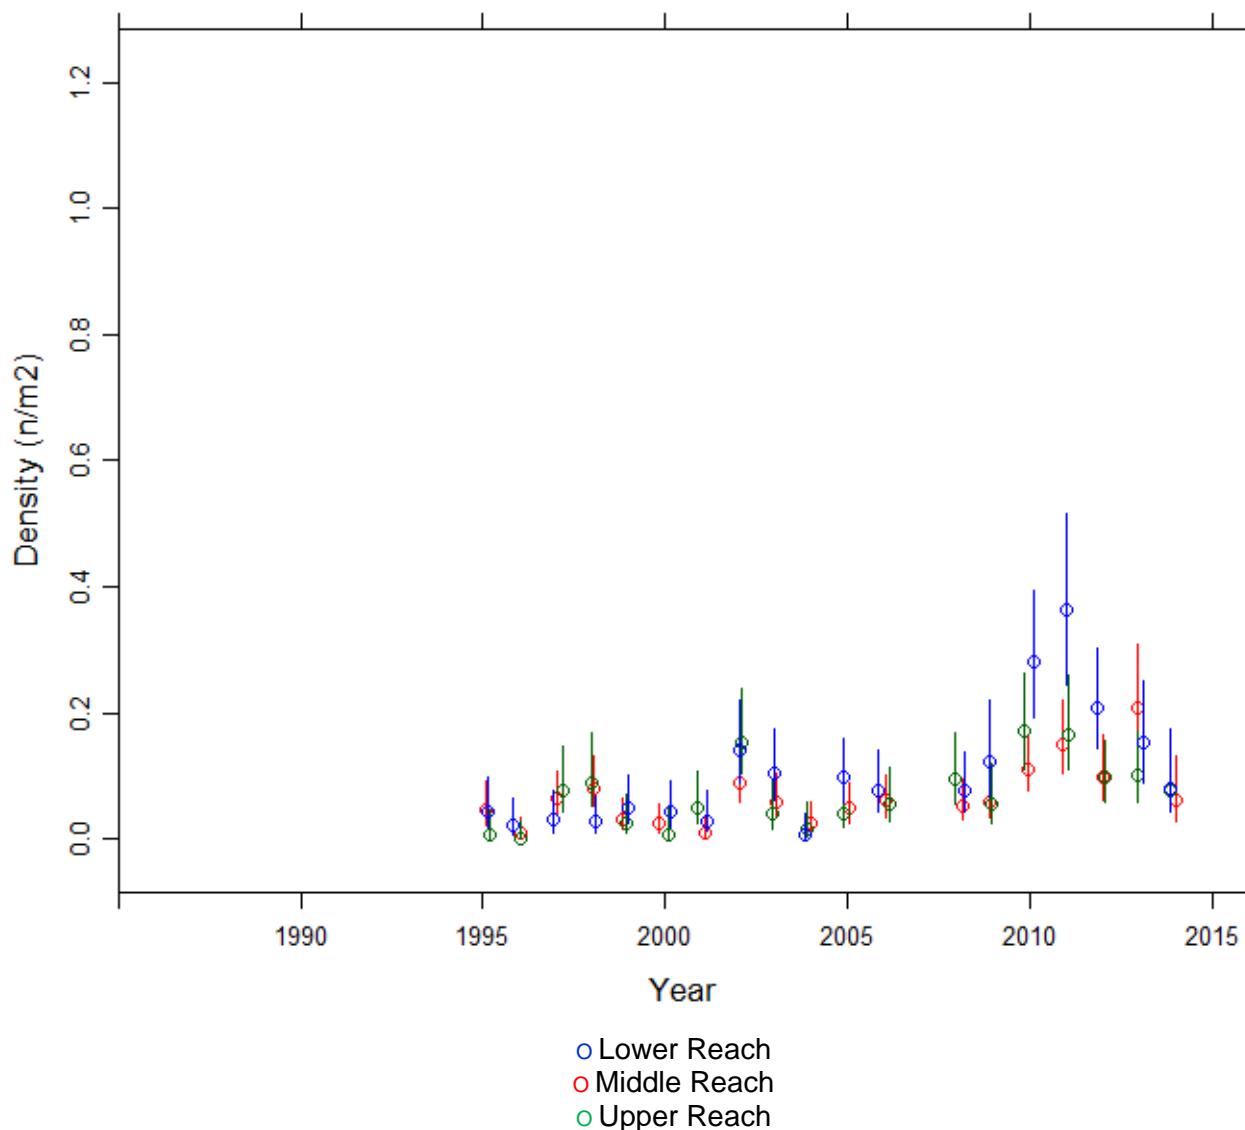

### 5.10.3 Fish data

#### 5.10.3.1 Summary of Trout fry density (numbers m<sup>-2</sup>), Afon Hafren

Fishing no longer funded after 2014.

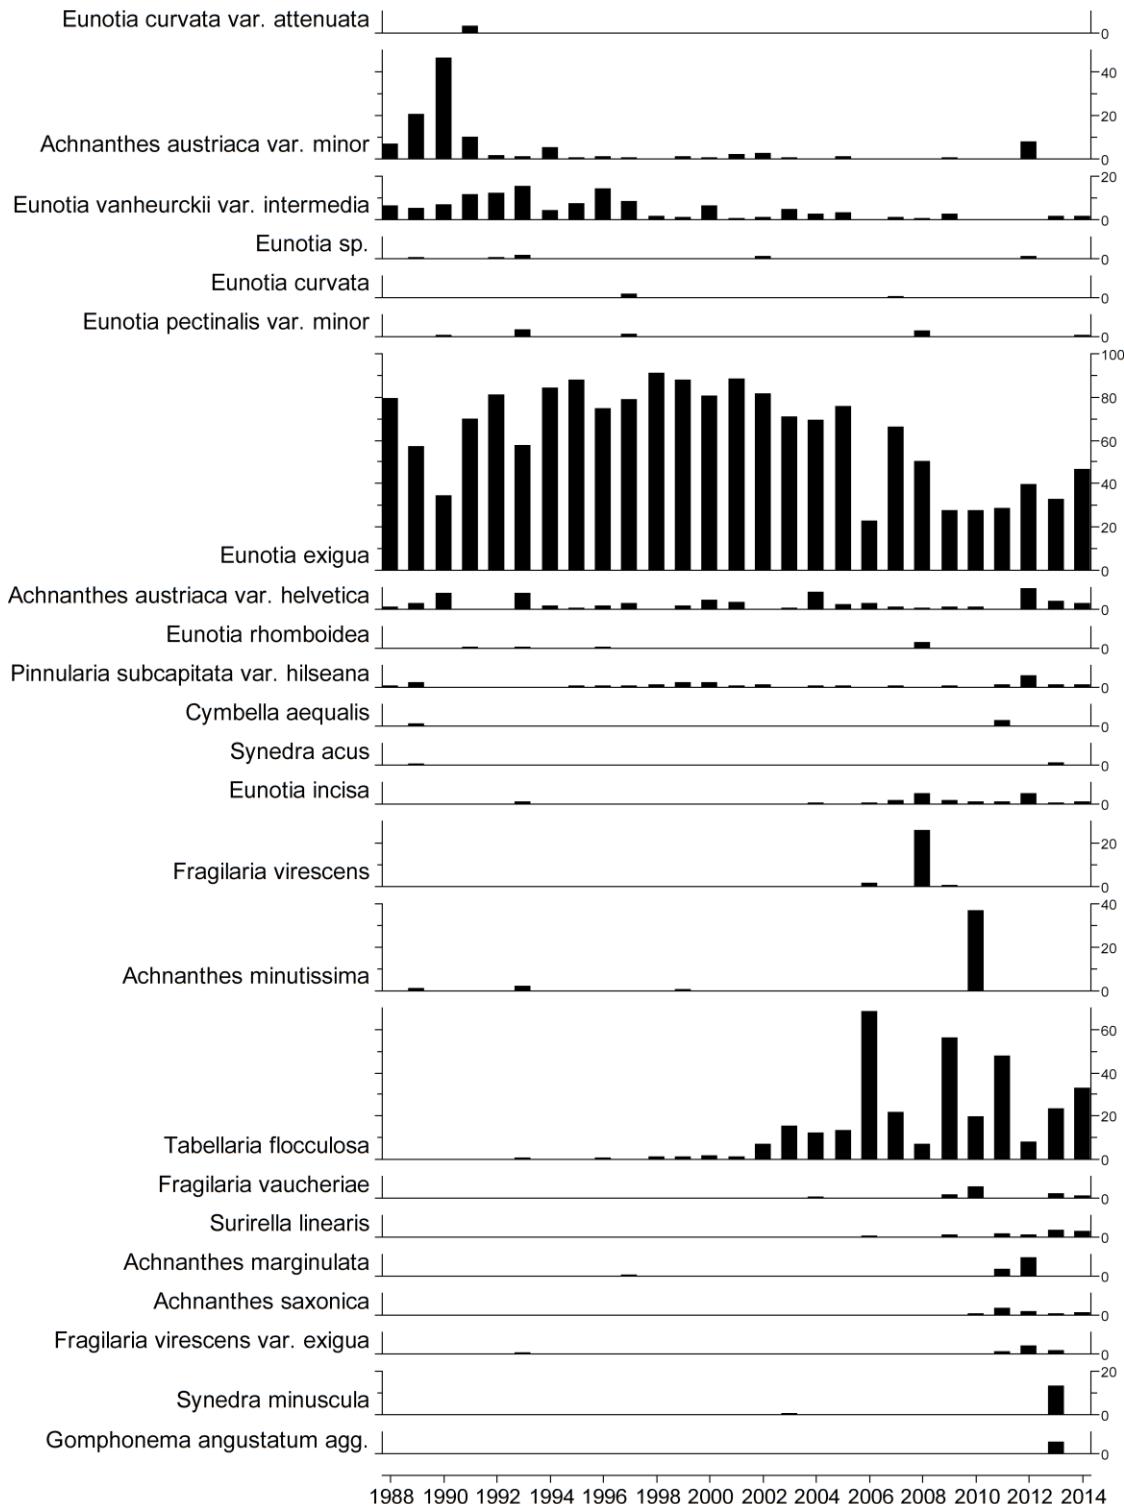

### 5.10.3.2 Summary of Trout parr density (numbers m<sup>-2</sup>), Afon Hafren

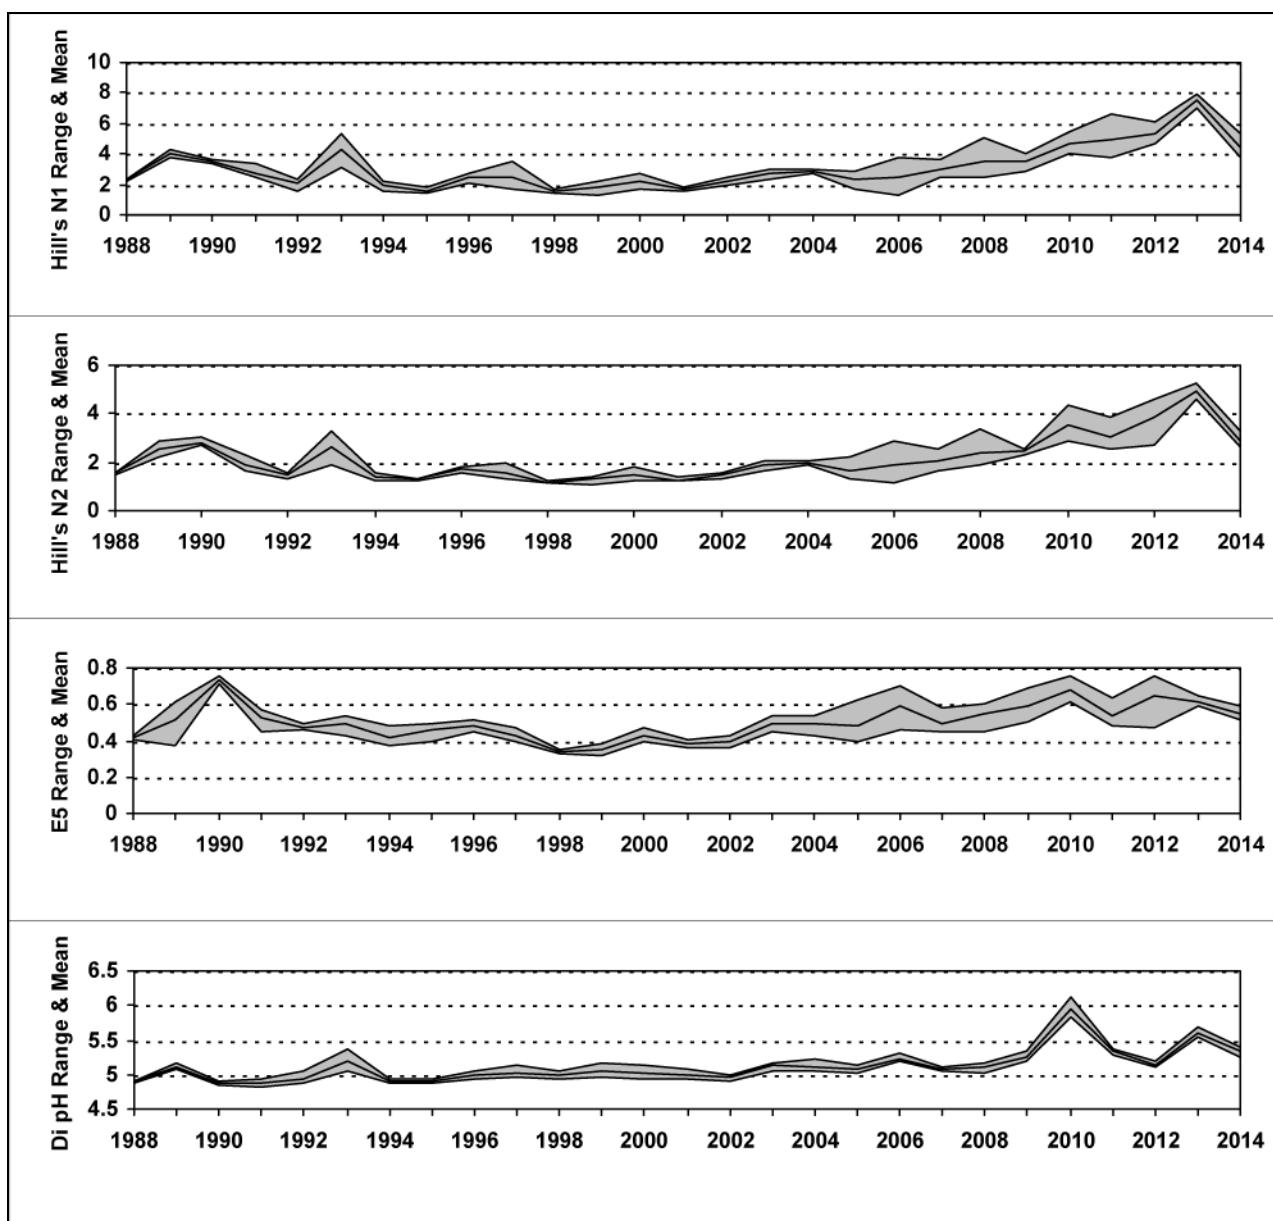

Fishing no longer funded after 2014.

## 5.10.4 Epilithic diatom data

### 5.10.4.1 Percentage abundance summary, Afon Hafren

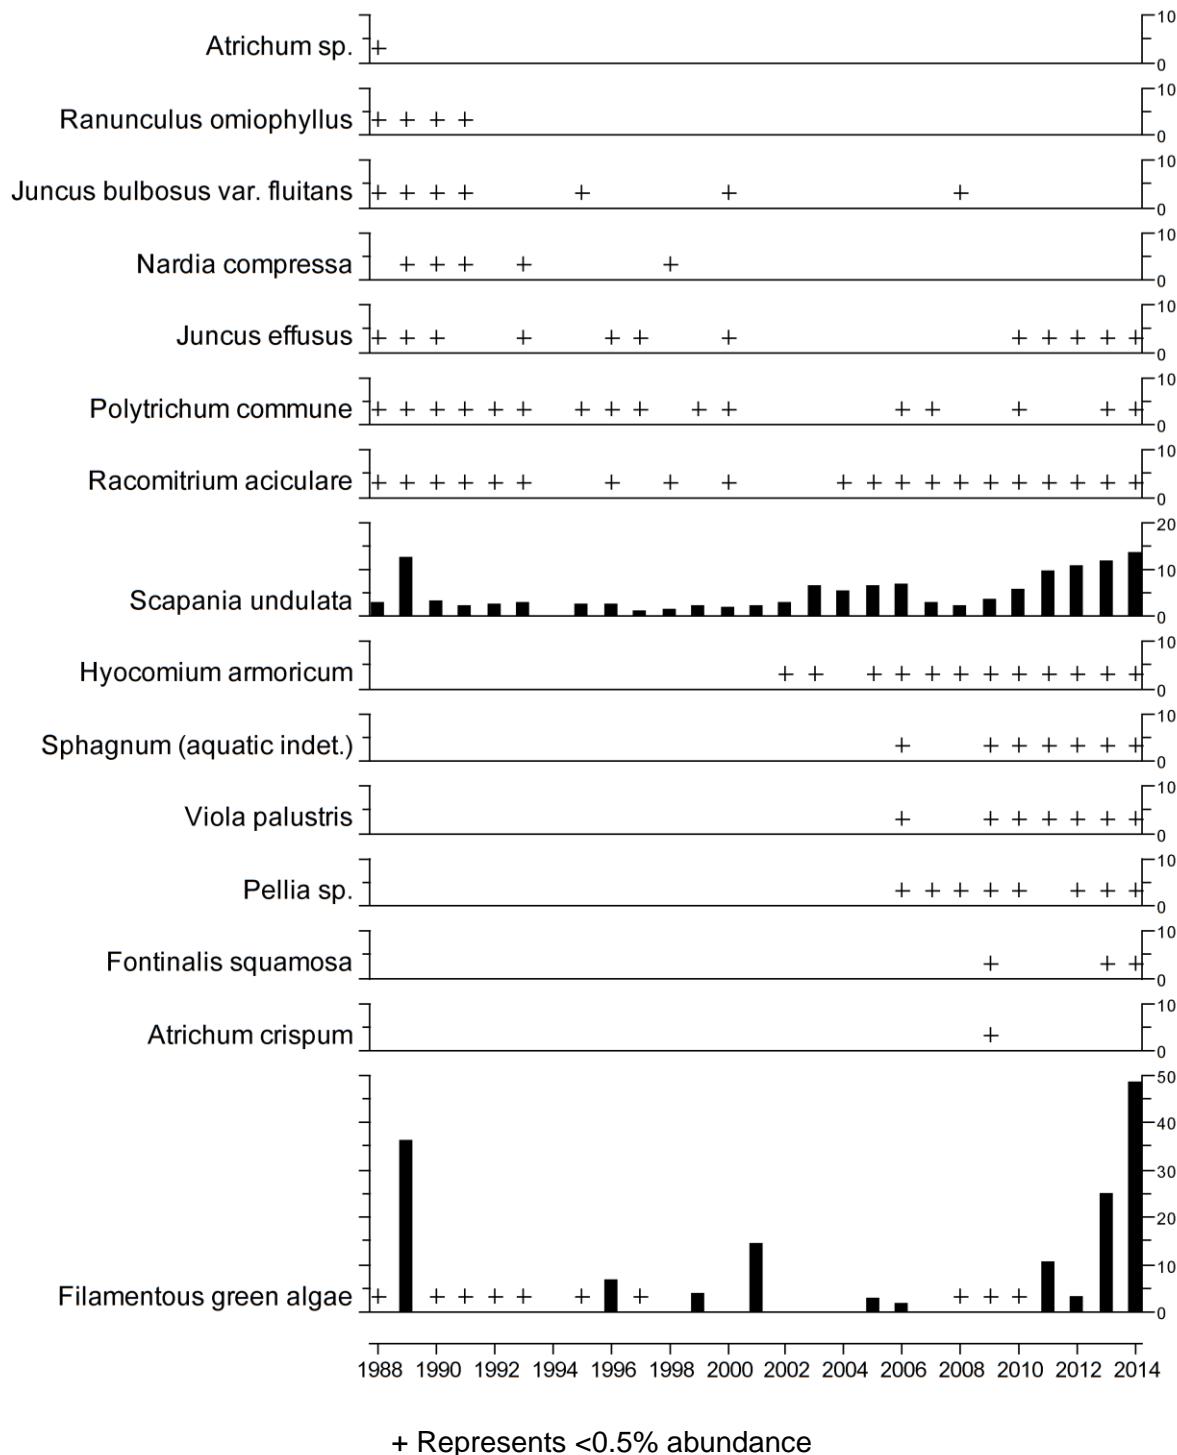

#### 5.10.4.1 Diatom summary statistics, Afon Hafren

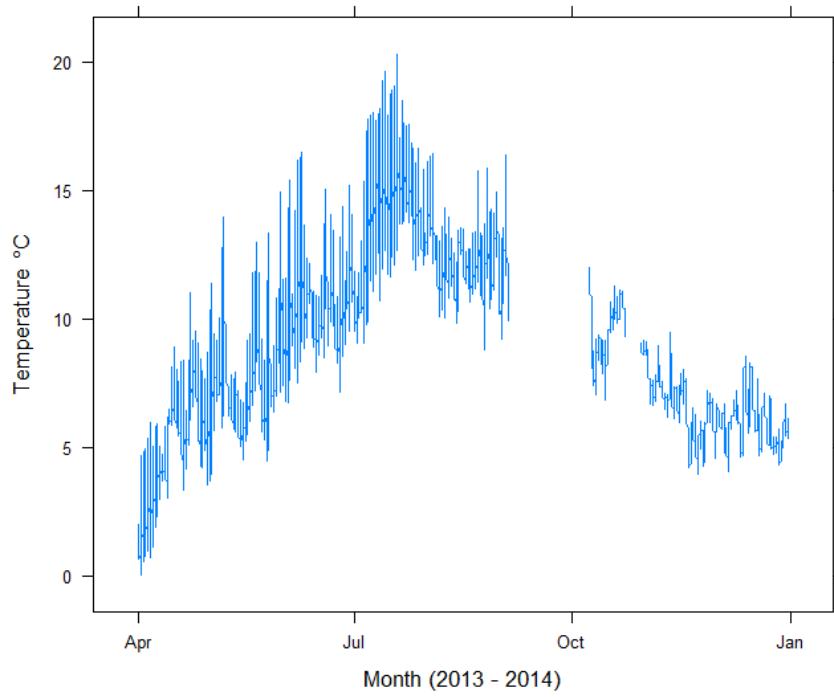

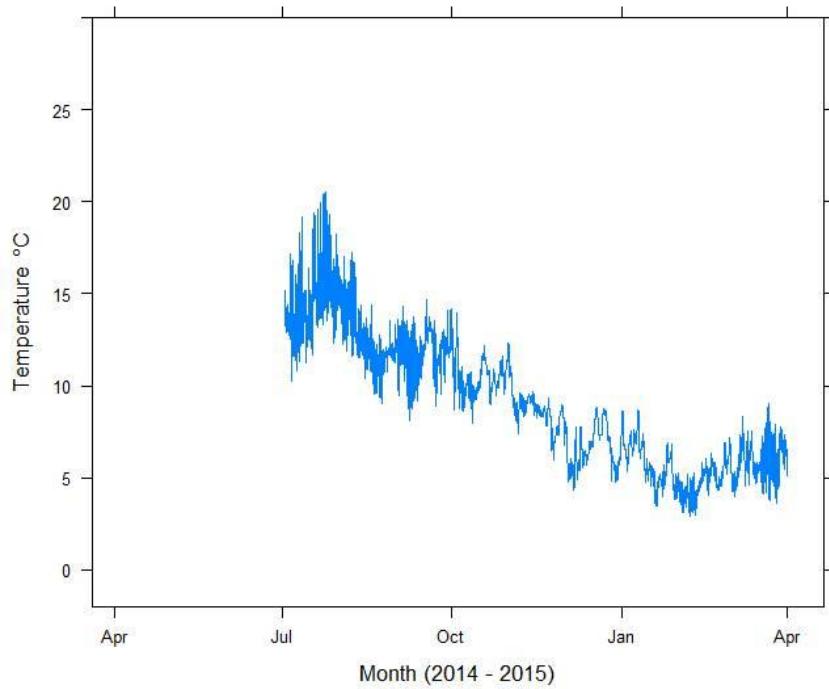

## 5.10.5 Aquatic macrophyte data, Afon Hafren

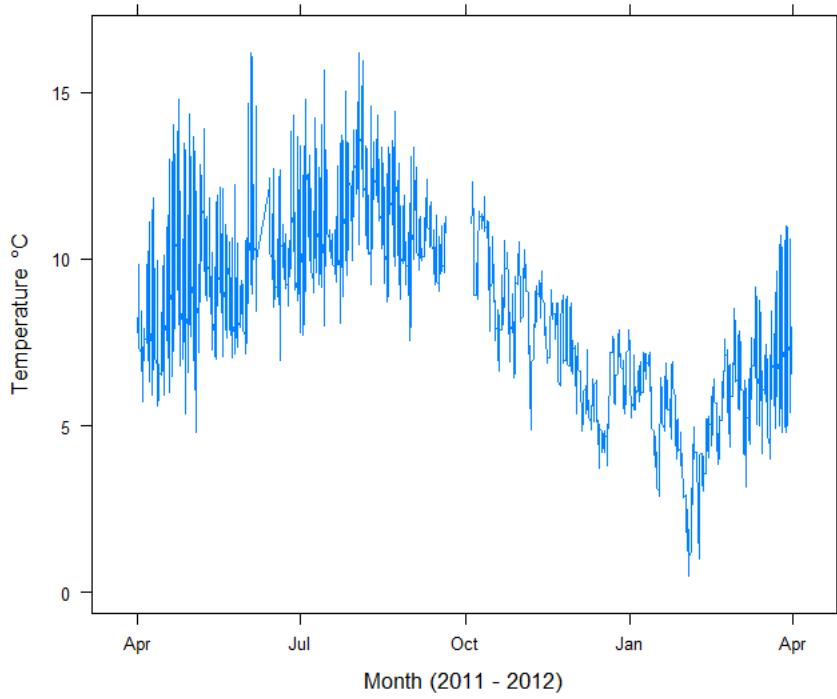

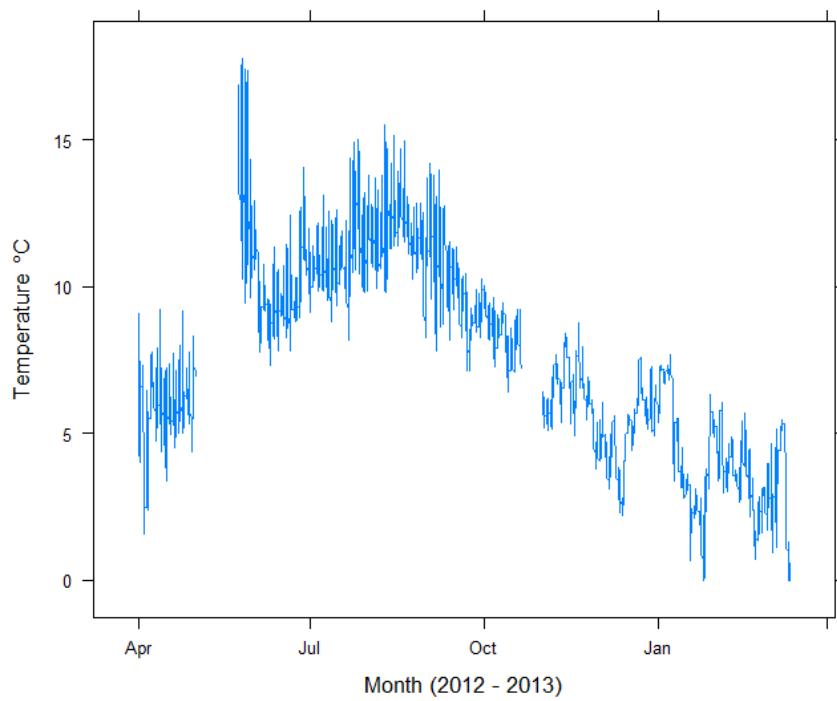

Percentage Species Cover

+ Represents <0.5% abundance

## 5.10.6 Thermistor data, Afon Hafren

Gaps due to thermistor malfunction

## 6 Afon Gwy

Figure 4 Afon Gwy biological survey section 18<sup>th</sup> September 2015

### 6.1 Summary Overview

Chemical and biological sample collection, analysis and data collation, quality control and archiving proceeded without any problems at Afon Gwy during the period from April 2015 to March 2016.

### 6.2 Water Chemistry

Samples were collected by CEH early every month throughout the period April 2015 to March 2016, delivered to the analytical laboratories on schedule and are in the process of being analysed, quality controlled and archived in the UKUWMN central chemistry database at CEH Lancaster.

### **6.3 Thermistors**

A thermistor, supplied by Marine Scotland, was downloaded and replaced on 18<sup>th</sup> of September 2015 by a team from ENSIS Ltd. It had functioned well during the previous year and the data were added to the ENSIS and MS thermistor water temperature database.

### **6.4 Epilithic Diatoms**

Epilithic diatoms were retrieved by a team from ENSIS from three sampling points in the stream on the 8<sup>th</sup> of July 2015. The samples have been made into slides and await funding for analysis.

### **6.5 Macroinvertebrates**

Aquatic macroinvertebrates were sampled on the 15<sup>th</sup> April 2015 by a team from QMuL. Five 1 minute kick samples were performed. The samples were counted and the data sent to ENSIS Ltd. The data is in the process of being quality screened before being added to the UKUWMN biological database at ENSIS.

### **6.6 Fish**

Due to resourcing cuts, fish surveying was not performed in Autumn 2015.

### **6.7 Aquatic Macrophytes**

Aquatic macrophytes were surveyed by a team from ENSIS on 18<sup>th</sup> of September 2015. Percentage cover scores were recorded and data will be added to the ENSIS biological database after microscope confirmation of bryophyte identifications.

### **6.8 Data Management and Reporting**

No problems or hiatus occurred with the collation and transfer of data within methodological programmes, or to the UKUWMN databases, during the reporting period.

The 2014-2015 annual report has been uploaded to the UKUWMN web page. The section on Afon Gwy appears in section 6.10 below.

The UKUWMN website page detailing Afon Gwy can be found here:  
[http://awmn.defra.gov.uk/sites/site\\_18.php](http://awmn.defra.gov.uk/sites/site_18.php)

Further publications from the contract period utilizing UKUWMN data from Afon Gwy are detailed in section 6.9 below.

## 6.9 Afon Gwy Recent UKUWMN Output

Oosthoek, S. (2016) Global browning: Why the world's fresh water is getting murkier. *New Scientist* (3055), 34-35. Reed Business Information, London.

Battarbee, R. W. (2015) Forestry, 'acid rain', and the acidification of lakes. In: *Nature's Conscience: the life and legacy of Derek Ratcliffe*, 385-400, Langford Press, Peterborough.

Battarbee, R. W. (2015) Remote lakes: pristine or polluted. UK and Ireland Lakes Network annual conference, Abergavenny. 4th March 2015.

Evans, C. D., Monteith, D. T., Shilland, E. M., Battarbee, R. W., Patrick, S. T. & Malcolm, I. A. (2015) 35 years of upland water quality monitoring in the UK: Foreseen events, unforeseen events, non-events and extreme events. 9th International Conference on Acid Deposition, Rochester, New York. October 19-23, 2015.

Evans, C. D. (2015) UK and international freshwater monitoring. Swedish Agricultural University, Uppsala. 11th May 2015, Invited keynote. Meeting to mark 50 years of freshwater monitoring in Sweden, attended by the King and Crown Princess.
