Information literacy...

- “... information literacy and lifelong learning are the beacons of the Information Society, illuminating the courses to development, prosperity and freedom. Information Literacy lies at the core of **lifelong learning**. It empowers people in all walks of life to seek, evaluate, use and create information effectively to achieve their personal, social, occupational and educational goals. It is a basic human right in a digital world and promotes social inclusion of all nations.” (UNESCO, 2006)

Information literacy in the workplace

“Information literacy should be defined as the ability to know what there is in a landscape and to draw meaning from this through engagement and experience with information” (Lloyd, 2006:570)

- ‘Learning’ is not the primary goal
- “...productivity, quality measurements, and development of expertise” (Lundh et al, 2013)
- “Effectiveness” (O’Farrill, 2010)
 - Information Literacy as Knowledge Management
 - NHS
- Firefighters, Lloyd (2005, 2006)
- SME and Charities ([Go On UK](#), 2013)

Recent documentation

- Transferring information know-how

- Information literacy is for life, not just for a good degree: a literature review
- Digital skills for tomorrow's world

Seven Pillars of Information Literacy

What do we mean by competencies?

- Confusion:
 - demonstrable behaviour
 - cognitive skills
 - personality traits
- Link competencies to performance
- Identify skill-based and behavioural competencies
- KSAOs: knowledge, skills, abilities and other characteristics

Table 1. A Comparison of Common Definitions of the Term of Competency.

Source	Definition of competency
Athey and Orth (1999)	A set of observable performance dimensions, including individual knowledge, skills, attitudes, and behaviors as well as collective team, process, and organizational capabilities, that are linked to high performance, and provide the organization with sustainable competitive advantage.
Bartram (2004)	Sets of behaviors that are instrumental in the delivery of desired results or outcomes. Also, a repertoire of capabilities, activities, processes, and responses available that enable a range of work demands to be met more effectively by some people than by others.
Campion et al. (2011)	Collections of knowledge, skills, abilities and other characteristics that are needed for effective performance in the jobs in question.
Catano (1998); Soderquist et al. (2009)	The knowledge, skills, and abilities that underlie effective or successful job performance, which are observable, measurable, and distinguish superior from average performance.
Chen and Naquin (2006)	The underlying individual work-related characteristics (e.g., skills, knowledge, attitudes, beliefs, motives, and traits) that enable successful job performance, where “successful” is understood to be in keeping with the organization’s strategic functions.
H. C. Frese (interviewed in Hayton & McEvoy, 2006)	A combination of skills, attitudes, and behaviors that an individual or an organization is competent at, that is, the ability to deliver, perform (a set of) tasks with relative ease and with a high level of predictability in terms of quality and timeliness.
Mansfield (1996)	A detailed, behaviorally specific description of the skills and traits that employees need to be effective in a job.
Parry (1996, 1998)	A cluster of related knowledge, attitudes, and skills that affects a major part of one’s job (i.e., one or more key responsibilities); that correlates with performance on the job; that can be measured against well-accepted standards; and can be improved via training and development

(Stevens, 2012)

Employability, information literacy, and library and information professionals

- Identify the key information literacy terminology of the workplace
- Use this to inform IL delivery relevant to these concepts to facilitate transition from FE and HE into employment
- Liaise with careers services, professional associations, employers, SME
