

Table 3. Sample size calculations for % change in SC-CSA and PBVC for a one year neuroprotective clinical trial in progressive MS (80% power, 5% significance), based on the adjusted values.

Treatment Effect	Sample size per arm in progressive MS	Sample size per arm in PPMS	Sample size per arm in SPMS
% change in SC-CSA			
30%	401	157	1538
50%	146	57	546
100%	38	15	138
PBVC			
30%	138	156	93
50%	51	57	33
100%	14	16	4
